Manufacturing Towns in China Yue Gong, 2018-12-29 This book offers an engaging and unique view of the governance of Chinese rural migrants in non factory areas of manufacturing towns By asking how authorities govern migrants as an ongoing source of cheap labor this book demonstrates and interprets authorities power exercised in the form of governing rationalities regulations programs activities and designated non factory spaces town and village centers and migrant living zones These power exercises take place routinely in migrants everyday lives but typically veil themselves producing knowledge that legitimates our understanding of migrants Based on their power exercises authorities governance of migrants like multiple invisible filters that select and help create migrant labor in non factory areas leads to an inclusion of a certain number of migrants as cheap factory workers and an exclusion of the rest Nevertheless by exercising their unique power techniques migrants can resist and alter authority governance thus the authorities power exercises are deficient and may ultimately be futile This book details these power exercises offers rewarding insights and can greatly enrich our understanding of China's local governance of migrants and migrant resistance

Politics in China William A. Joseph, 2014 On October 1 2009 the People's Republic of China PRC celebrated the 60th anniversary of its founding And what an eventful and tumultuous six decades it had been During that time under the leadership of the Chinese Communist Party CCP China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence Over those same years the PRC also experienced the most deadly famine in human history caused largely by the actions and inactions of its political leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy Today China is for the most part peaceful prospering and proud This is the China that was on display for the world to see during the Beijing Olympics in 2008 The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities and a rising tide of social protest Politics in China is an authoritative introduction to how the world's most populous nation and rapidly rising global power is governed

The Next Factory of the World Irene Yuan Sun, 2017-10-17 A Best Business Book of 2017 The Financial Times China is now the biggest foreign player in Africa It's Africa's largest trade partner the largest infrastructure financier and the fastest growing source of foreign direct investment Chinese entrepreneurs are flooding into the continent investing in long term assets such as factories and heavy equipment Considering Africa's difficult history of colonialism one might suspect that China's activity there is another instance of a foreign power exploiting resources But as author Irene Yuan Sun vividly shows in this remarkable book it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China a global manufacturing powerhouse The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West particularly that of the United States Despite fifty years of Western aid programs Africa still has more people living in extreme poverty than any other region in the world Those who are serious about raising living standards across the continent know that another strategy is needed Chinese investment gives rise to a tantalizing possibility that Africa can industrialize in the coming generation With a manufacturing led transformation Africa would be following in the footsteps of the United States in the nineteenth century Japan in the early twentieth and the Asian Tigers in

the late twentieth Many may consider this an old fashioned way to develop but as Sun argues it s the only one that s proven to raise living standards across entire societies in a lasting way And with every new Chinese factory boss setting up machinery and hiring African workers and managers that possibility becomes more real for Africa With fascinating and moving human stories along with incisive business and economic analysis *The Next Factory of the World* will make you rethink both China s role in the world and Africa s future in the globalized economy *China in the 21st Century* Jeffrey N.
