Fanuc Robot Operation Manual:

Flexible Automation in Japan J. Hartley, 2013-04-09 Much has been said and written about Japan's manufacturing prowess. Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside. Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists. Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years. He understands the culture, can speak the language and has extensive contacts at the highest level. Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology. This he has been doing on a regular basis to IFS magazines *The Industrial Robot*, *Assembly Automation*, *Sensor Review* and *The FMS Magazine*. Most of the material in this book is from John Hartley's pen and represents his most significant contributions on flexible automation in Japan to these journals over the last three years. It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry.

Advances in Mechanism Design IV Jaroslav Beran, Martin Bílek, Miroslav Václavík, Petr Žabka, 2024-08-30 This book presents the latest research advances relating to machines and mechanisms. Featuring papers from the XIV International Conference on the Theory of Machines and Mechanisms TMM held in Liberec, Czech Republic on September 3-5, 2024, it includes a selection of the most important new results and developments. The book is divided into five parts representing a well-balanced overview and spanning the general theory of machines and mechanisms through analysis and synthesis of planar and spatial mechanisms, linkages and cams, robots and manipulators, dynamics of machines and mechanisms, rotor dynamics, computational mechanics, vibration and noise in machines, optimization of mechanisms and machines, mechanisms of textile machines, mechatronics and control and monitoring systems of machines. This conference is traditionally held every four years under the auspices of the international organisation IFToMM and the Czech Society for Mechanics.
