Fastest Paths To A Job In The Computer Industry:

Fastest Paths to a Job in the Computer Industry Ronald J. Leach, 2013-04-14 This book provides essential information about the fastest ways to get jobs in the computer industry even without a four year degree or extensive computer programming experience Jobs described include Technician Help Desk Cable Installer Assembler Hardware Tester Computer Repair Expert Router Configuration Specialist Free lance special purpose service provider Word Processor Data Entry Clerk Certified Expert in a particular technology Microsoft MCSE Novell Cisco 3Com etc Obsolete Programming Languages Expert Web Designer Computer Artist Desktop publisher Computer Salesperson Computer Trainer ABOUT THE AUTHOR Ronald J Leach Ph D was a long term professor of Computer Science and former department chair before he recently retired from Howard University During the 2004 2005 academic year while he was department chair Howard University sent more students to Microsoft than any other school in the United States *Women into Computing* Gillian Lovegrove, Barbara Segal, 2013-06-29 This book contains the majority of the papers presented at the 1990 Women into Computing Conference together with selected papers from the 1989 and 1988 Conferences In 1988 the main theme running through the Conference was that of dismay at the low number of women taking computing courses or following computing careers The 1989 Conference was concerned solely with workshops for schoolgirls and the 1990 Conference concentrated on strategies rather than an assessment of the situation As editors we set as our task to make a selection of papers presenting the overall picture in 1990 We found that many of the issues discussed in 1988 are still a cause for concern in 1990 but that strategies to improve the situation are many and varied Section I contains speeches from the invited speakers and needs little introduction Section II contains papers covering so me attitudes and issues of concern ranging from the specific Gill Russell on child care and Laurie Keller on hacker mentality through to broader aspects of gender inequality the papers of Flis Henwood Margaret Bruce and Alison Adam and Lyn Bryant Susan Jones takes a look at the reasons why we should want to see more women in computing whilst Gillian Lovegrove and Wendy Hall present a more general paper on school and higher education

Handbook of Research on Pathways and Opportunities Into the Business of Esports Andrews, Sharon, Crawford, Caroline M., 2021-06-25 Esports have attracted considerable attention over the past few years and become an industry that is projected to continue to increase rapidly Intersecting with the esports industry are organizations and businesses that develop and support the esports game experience Included is the entrepreneurial spirit of gamers who are interested in creating their own career paths through capturing and posting gaming microassists on different public venues that are driven by advertising dollars invitational competition monetary winnings and other forms of marketing their expertise for financial gain All these organizations and industries form satellites of career opportunities as well as opportunities for research and enhanced forward leaning study Such career opportunities can be explicitly addressed within the structure of university degree and micro credential certificate programs some of which have begun to offer esports directed degrees but most of

which have not yet moved from esports clubs into a recognition of the business and industry monetization of esports The Handbook of Research on Pathways and Opportunities Into the Business of Esports addresses the intersection of esports gaming and the business and industry of esports rather than an exploration of the video games themselves It is the supporting and intersecting industry driven by esports and the vast opportunities this brings that are the foci of this book Covering topics including digital learning esport marketing curriculum and gaming culture this text is essential for business professionals industry analysts entrepreneurs managers coaches marketers advertisers brand managers university and college administrators faculty and researchers students professors and academicians **The Fast Path to Corporate**
