organization's supply operation and enable managers to take an active role in critical decisions. It is slightly different from APICS's CSCP in that it is targeting those who wish to have a broad understanding of all components of the profession. It focuses primarily on strategic supply management less on fundamental or tactical level knowledge. CSCP places heavier focus on integrated supply chain while CPSM does not. To succeed in the CPSM exams you need to get yourself truly familiar with the most important information by going through sufficiently focused revision.
