Deadly Deceptions Hqn:

Deadly Dairy Deception Robert Bibb, 2010-06 Prostate cancer and breast cancer incidence have reached epidemic proportions with younger age at development becoming commonplace. In fact, it seems many people believe developing one of these cancers is unavoidable. It does not have to be that way. In this thought-provoking work, Dr. Robert Bibb introduces readers everywhere to the killer disguised as a saint: dairy products. Americans consistently hear about the benefits of dairy consumption, such as getting calcium and vitamin D. But rarely are Americans presented with Bibb's insight into the scientific downfalls of consuming dairy products. Bibb goes into detail, sharing his information on genes and hormones that affect the cells that produce cancer. He provides thorough research and several statistics linking the milk you put on your cereal or the cheese you eat with crackers to cancer. He even proves that a dairy-free diet can serve as a preventative or perhaps curative method for prostate and breast cancer. Don't become a statistic. Learn about the Deadly Dairy Deception and begin changing your health today.
