*Dear Professor Einstein* Alice Calaprice, 2010-01-28 This enchanting book displays a small sampling of the amusing touching and sometimes precocious letters sent to Albert Einstein by children from around the world and his often witty and very considerate responses Alice Calaprice has compiled a delightful and charming collection of more than 60 letters most never published before from children to perhaps the greatest scientist of all time Enhancing this correspondence are numerous photographs showing Einstein amid children wearing an Indian headdress carrying a puppet of himself donning furry slippers among many other wonderful pictures They reveal the intimate human side of the great public persona a man who though he spent his days contemplating the impersonal abstractions of mathematics and physics was very fond of children and enjoyed being in their company Obviously Einstein led a busy life and so he could not answer every letter sent to him Nonetheless he made time to respond to those that touched him in some way To Monique from New York who asked about the age of the Earth and when it will come to an end he patiently responded that it is a little more than a billion years old and As for the question of the end of it I advise Wait and see To six little scientists from Morgan City Louisiana who despite the skepticism of their classmates maintained that life would survive even if the sun burned out he wrote The minority is sometimes right but not in your case Complete with a foreword by Einstein s granddaughter Evelyn a biography and chronology of Einstein s life and an introduction by Einstein scholar Robert Schulmann on the great scientist s educational philosophy this wonderful compilation will be welcomed by teachers parents and all the young budding scientists in their lives

*Dear Professor Einstein* Albert Einstein, 2002 We are often amazed by the curiosity of children and the questions they ask And letters to and from children are always appealing especially so when they are written to someone famous In *Dear professor Einstein* Alice Calaprice has gathered a delightful and charming collection of more than sixty letters from children to Albert Einstein Einstein could not respond to every letter written to him but the responses he did find the time to write reveal the intimate human side of the great public persona a man who though he spent his days contemplating mathematics and physics was very fond of children and enjoyed being in their company Whether the children wrote to Einstein for class projects out of curiosity or because of prodding from a parent their letters are amusing touching and sometimes quite precocious Enhancing this correspondence are numerous splendid photographs showing Einstein amid children wearing an Indian headdress carrying a puppet of himself and donning fuzzy slippers among many other wonderful pictures This book is complete with a foreword by Einstein s granddaughter Evelyn a biography and chronology of Einstein s life and an essay by Einstein scholar Robert Schulmann on the great scientist s educational philosophy **Einstein's**

**Pathway to the Special Theory of Relativity** Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein s journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from

his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door. He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office. The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905. For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905. Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery. In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point. In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity. The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed. The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein.
