Decade Of The Wolf Returning The Wild To Yellowstone:

Decade of the Wolf Douglas Smith, Gary Ferguson, 2012-04-17 In Decade of the Wolf project leader Douglas W Smith and acclaimed nature writer Gary Ferguson describe the journey of thirty one Canadian gray wolves that were released in 1995 and 1996 into Yellowstone National Park and the people who faithfully followed them The wolves have not only survived but completely changed the ecosystem spilling a fresh measure of wildness across the world's first national park This updated edition includes additional wolf profiles new information on the effects of climate change and disease and a retrospective on what the scientists have learned during this extended study of the Yellowstone wolves *The Wolves Return* Celia Godkin, 2017-03-23 In 1995-96 twenty three grey wolves were released in Yellowstone National Park where due to over hunting there had been no wolves at all for almost seventy years This reintroduction project was an overwhelming success Over twenty years later we can still see the changes the grey wolves brought to Yellowstone National Park Now that the elk graze higher ground seedlings are growing tall rivers are getting deeper as beavers return and a lively pond ecosystem is developing This true story offers an important lesson about the difference one creature can make in creating a healthy thriving world Acclaimed environmental author and illustrator Celia Godkin delivers an inspiring feel good environmental story that is the perfect follow up to her most recent nonfiction picture book Skydiver Saving the Fastest Bird in the World a Bank Street Best Book that was also shortlisted for several awards The Wolves Return features Godkin's evocative full spread pencil crayon and watercolour illustrations and is further enhanced by extensive information on the Yellowstone Wolf Project including maps and statistics that will fascinate young animal lovers and inquisitive minds Protecting Yellowstone Michael J. Yochim, 2013-03-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park's profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks *Wolves* Duncan Searl, 2007-01-01 Discusses the social behaviors of wolves and how this makes them great problem solvers as proven by Dr Frank's experiments on their intelligence versus that

of dogs **Range Wars** Ryan H. Edgington, 2014-07-01 Established in south central New Mexico at the end of World War II White Sands Missile Range is the largest overland military reserve in the western hemisphere It was the site of the first nuclear explosion the birthplace of the American space program and the primary site for testing U S missile capabilities In this environmental history of White Sands Missile Range Ryan H Edgington traces the uneasy relationships between the military the federal government local ranchers environmentalists state game and fish personnel biologists and ecologists state and federal political figures hunters and tourists after World War II as they all struggled to define and productively use the militarized western landscape Environmentalists ranchers tourists and other groups joined together to transform the meaning and uses of this region challenging the authority of the national security state to dictate the environmental and cultural value of a rural American landscape As a result White Sands became a locus of competing geographies informed not only by the far reaching intellectual economic and environmental changes wrought by the cold war but also by regional history culture and traditions *Bringing Back the Wolves* Jude Isabella, 2020-03-03 An unintended experiment teaches real life lessons about life s intricate interconnections In the 1800s the American government decided to eliminate threats to livestock near Yellowstone National Park By 1926 there were no gray wolves left in the park This set off a cascade of devastating changes to virtually every part of the park s ecosystem and the once thriving landscape was soon in distress Then in an effort to reverse course gray wolves were reintroduced in 1995 In time animal populations start to stabilize waterways are restored and miraculously health returns to the park This remarkable story of transformation is sure to captivate and to inspire respect for nature s surprisingly complex balancing act **Novel Ecosystems** Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystems services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today s rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question

of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs/ecosystems

The Social Behavior of Older Animals Anne Innis Dagg, 2009-02-02 A groundbreaking study on the lives of senior mammals and birds from the aging of alphas to the role of grandmothers by the author of *Animal Friendships* How do young and old social animals view each other Are aged animals perceived by others as weaker Or wiser What is the relationship between age and power among social animals Taking a cue from Frans de Waal's seminal work examining the lives of chimpanzees Anne Innis Dagg in this pioneering study probes the lives of older mammals and birds Synthesizing the available scientific research and anecdotal evidence she explores how aging affects the lives and behavior of animals ranging from elk to elephants and gulls to gorillas examining such topics as longevity how others in a group view senior members in regard to leadership wisdom and teaching mating success interactions with mates and offspring how aging affects dominance changes in aggressive behavior and adaptability and death and dying At once instructive and compelling this theme spanning book reveals the complex nature of maturity in scores of social species and shows that animal behavior often displays the same diversity we find in ourselves Dagg's book should be a corrective to us all species that lose or ignore the contributions of their older members do so at their peril

A Reenchanted World James William Gibson, 2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature's magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in

Earthly Bodies Vanessa Chakour, 2024-09-24 Examining the cultural belief that our animal instincts are to be corrected or corralled nature advocate and rewilding facilitator Vanessa Chakour explores our inner and outer landscapes through the lens of wild animals How can wolves misunderstood in myths but vital to ecosystems teach us to

rewrite dangerous stories and respect nature's wisdom How do the peaceful coexistence strategies of black bears offer insights into sharing resources How can the engineering feats of beavers guide us in fostering regenerative building solutions and vibrant ecosystems What can the loyal partnership of seahorses teach us about nurturing and love In *Earthly Bodies* Vanessa draws parallels from struggles she has weathered in her own life to those endured by twenty three wild animals from wolves to sea lions exploring our unease of feeling like prey challenging the entrapment of our limiting beliefs contextualizing the turmoil of fractured landscapes and affirming our primal ache to belong Vanessa's pivotal encounters with creatures in sync with their primal rhythms and demands illustrate the necessity of relying on the intelligence of gut instinct of the magnetic pull of attraction of the body's mandate for restorative rest and of the sacred bonds of love We often cut ourselves off from identifying with wild animals like wolves foxes bats and bears and other animal relatives out of fear ignorance disgust or misunderstanding yet our earthly human bodies can lead us in our pursuits of pleasure love wonder healing and connection With each section containing an aspect of injured animal's return home to their natural habitat and in our case to an embodied instinctual self *Earthly Bodies* meditates on how this journey from enclosures to rehabilitation to soft release and finally to homing raises questions about our humanity In so learning we understand how we might benefit from embracing our own animal nature to gain deeper self actualization find common ground with our fellow animals and learn to thrive together

The Better to Eat You With Joel Berger, 2009-11-15 At dawn on a brutally cold January morning Joel Berger crouched in the icy grandeur of the Teton Range It had been three years since wolves were reintroduced to Yellowstone after a sixty year absence and members of a wolf pack were approaching a herd of elk To Berger's utter shock the elk ignored the wolves as they went in for the kill The brutal attack that followed swift and bloody led Berger to hypothesize that after only six decades the elk had forgotten to fear a species that had survived by eating them for hundreds of millennia Berger's fieldwork that frigid day raised important questions that would require years of travel and research to answer Can naive

animals avoid extinction when they encounter reintroduced carnivores To what extent is fear culturally transmitted And how can a better understanding of current predator prey behavior help demystify past extinctions and inform future conservation The Better to Eat You With is the chronicle of Berger s search for answers From Yellowstone s elk and wolves to rhinos living with African lions and moose coexisting with tigers and bears in Asia Berger tracks cultures of fear in animals across continents and climates engaging readers with a stimulating combination of natural history personal experience and conservation Whether battling bureaucracy in the statehouse or fighting subzero wind chills in the field Berger puts himself in the middle of the action The Better to Eat You With invites readers to join him there The thrilling tales he tells reveal a great deal not only about survival in the animal kingdom but also the process of doing science in foreboding conditions and hostile environments

A Pedagogy of Responsibility Rebecca A. Martusewicz, 2018-09-03
 Drawing on the theories of author and conservationist Wendell Berry for the field of EcoJustice Education this book articulates a pedagogy of responsibility as a three pronged approach grounded in the recognition that our planet balances an essential and fragile interdependence between all living creatures Examining the deep cultural roots of social and ecological problems perpetuated by schools and institutions Martusewicz identifies practices relationships beliefs and traditions that contribute to healthier communities She calls for imaginative re thinking of education as an ethical process based in a vision of healthy just and sustainable communities Using a critical analytical process Martusewicz reveals how values of exploitation mastery and dispossession of land and people have taken hold in our educational system and communities and employs Berry s philosophy and wisdom to interrogate and develop a pedagogy of responsibility as an antidote to such harmful ideologies structures and patterns Berry s critical work and the author s relatable storytelling challenge taken for granted perspectives and open new ways of thinking about teaching for democratic and sustainable communities

Producing Predators Michael D. Wise, 2016-08-01
 Wise argues that contestations between Native and non Native people over hunting labor and the livestock industry drove the development of predator eradication programs in Montana and Alberta from the 1880s onward The history of these anti predator programs was significant not only for their ecological effects but also for their enduring cultural legacies of colonialism in the Northern Rockies

Natural Alan Levinovitz, 2020-04-07
 Illuminates the far reaching harms of believing that natural means good from misinformation about health choices to justifications for sexism racism and flawed economic policies People love what s natural it s the best way to eat the best way to parent even the best way to act naturally just as nature intended Appeals to the wisdom of nature are among the most powerful arguments in the history of human thought Yet Nature with a capital N and natural goodness are not objective or scientific In this groundbreaking book scholar of religion Alan Levinovitz demonstrates that these beliefs are

actually religious and highlights the many dangers of substituting simple myths for complicated realities. It may not seem like a problem when it comes to paying a premium for organic food. But what about condemnations of unnatural sexual activity? The guilt that attends not having a natural birth? Economic deregulation justified by the inherent goodness of natural markets? In *Natural*, readers embark on an epic journey from Peruvian rainforests to the backcountry in Yellowstone Park, from a natural bodybuilding competition to a natural cancer curing clinic. The result is an essential new perspective that shatters faith in Nature's goodness and points to a better alternative. We can love nature without worshipping it, and we can work toward a better world with humility and dialogue rather than taboos and zealotry.

The Top Books of the Year Decade Of The Wolf Returning The Wild To Yellowstone The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Decade Of The Wolf Returning The Wild To Yellowstone : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
