Sheet Metal Industries, 2000 *Industrial Robot Applications* E. Appleton, D.J. Williams, 2012-12-06 The hardest data for managers and engineers in charge of the design and implementation of robot systems to acquire is also the most valuable case studies detailing best current practice and the return on investment actually achieved It has been a major goal of the British Robot Association among other professional groups to organise meetings where such case studies are presented and discussed between members but the obvious restrictions of commercial confidentiality lead to considerable difficulty especially in relation to the best recent installations The authors of this book have been in the uniquely privileged position of lecturing in the Cambridge University Production Engineering Tripos a course specially organised in conjunction with a number of leading companies applying robots and automation Actual case studies from these companies form an important part of the course making this book that has emerged from it a uniquely important addition to our Open University Press series *The International Robot Industry Report* John Mortimer, Brian Rooks, 2013-04-17 Like many other new technologies which have since been seized and exploited by others the industrial robot is a British invention In 1957 a patent was produced by a British inventor Cyril Walter Kenward and later it became crucial to the future of robotics For across the Atlantic two robot builders Unimation and AMF both infringed this patent and ultimately a cash settlement was made to Kenward The owner of Unimation Inc was Joseph Engelberger an entrepreneur and avid reader of Isaac Asimov the writer who helped to create the image of the benevolent robot It is claimed that Engelberger's journey of fame down the road which led to him being hailed as the father of robotics can be traced to the day that he met George C Devol at a cocktail party Devol was an inventor with an impressive list of patents to his name in the electronics field One of Devol's patent applications referred to a Programmed Transfer Article Devol's patent was issued in 1961 as US Patent 2 988 237 and this formed the basis of the Unimate robot which first saw the light of day in 1960 The first Unimate was sold to Ford Motor Company which used it to tend a die casting machine It is perhaps ironic that the first robot was used by a company which refused to recognise the machine as a robot preferring instead to call it a Universal Transfer Device

Robotica, 1995 **Welding and Metal Fabrication**, 1991 **Human-Friendly Robotics 2019** Federica Ferraguti, Valeria Villani, Lorenzo Sabattini, Marcello Bonfè, 2020-02-20 This book covers a wide range of topics related to human robot interaction both physical and cognitive including theories methodologies technologies and empirical and experimental studies The International Workshop on Human Friendly Robotics HFR is an annual meeting that brings

together academic scientists researchers and research scholars to present their latest original findings on all aspects concerning the introduction of robots into everyday life The growing need to automate daily tasks combined with new robot technologies is driving the development of human friendly robots i e safe and dependable machines that operate in close proximity to humans or directly interact with them in a wide range of contexts The technological shift from classical industrial robots which are safely kept away from humans in cages to robots that are used in close collaboration with humans is faced with major challenges that need to be overcome The objective of the workshop was to stimulate discussion and exchange knowledge on design control safety and ethical issues concerning the introduction of robots into everyday life The 12th installment was organized by the University of Modena and Reggio Emilia and took place in Reggio Emilia Italy
