Level I & HCPCS Level II Modifiers

The following modifiers are a subset of the AMA's Current Procedural Terminology (CPT) 2016 code set.

CPT Level I Modifiers

- 22 Increased Procedural Services:** When the work reported is greater in scope than ordinarily reported, an increase in the number of units may be identified by adding modifier 22 to the usual procedure code. Documentation must support the substantial additional work and the reason for the additional work (e.g., increased intensity, time, technical difficulty of procedure, severity of patient's condition, physical and mental effort required). **Notes:** This modifier should not be appended to an E/M service.
- 23 Unusual Anesthesia:** Occasionally, a procedure, which usually requires either no anesthesia or local anesthesia, because of unusual circumstances must be done under general anesthesia. This circumstance may be reported by adding modifier 23 to the procedure code of the basic service.
- 24 Unusual Distraction and Management Services by the Same Physician or Other Qualified Health Care Professional During a Postoperative Period:** The physician or other qualified health care professional may need to indicate that an evaluation and management service was performed during a postoperative period for a wound, unrelated to the original procedure. This circumstance may be reported by adding modifier 24 to the appropriate level of E/M service.
- 25 Significant, Separately Identifiable Evaluation and Management Service by the Same Physician or Other Qualified Health Care Professional on the Same Day of the Procedure or Other Service:** It may be necessary to indicate that on the day a procedure or service identified by a CPT code was performed, the patient's condition required a significant, separately identifiable E/M service above and beyond the other service provided or beyond the usual preoperative and postoperative care associated with the procedure that was performed. A significant, separately identifiable E/M service is defined as substantiated by documentation that indicates the elements of care for the separate E/M service to be reported are Evaluation and Management Services (Outline for Documentation on Determining Level of E/M Service). The E/M service may be provided by the

physician or condition for which the procedure and/or service was provided. As such, different diagnoses can not be reported for reporting of the E/M service on the same date. This circumstance may be reported by adding modifier 25 to the appropriate level of E/M service. **Notes:** This modifier is not used to report an E/M service that resulted in a decision to perform surgery. See modifier 57, for significant, separately identifiable non-E/M services, see modifier 58.

- 26 Professional Component:** Certain procedures are a combination of a physician or other qualified health care professional component and a technical component. When the physician or other qualified health care professional component is reported separately, the service may be identified by adding modifier 26 to the usual procedure number.
- 52 Reduced Services:** Services related to mandated consultation and/or related services (e.g., third party payer, governmental, legislative or regulatory requirement) may be identified by adding modifier 52 to the basic procedure.
- 53 Preventive Services:** When the primary purpose of the service is the delivery of an evidence-based service in accordance with a U.S. Preventive Services Task Force A or B rating in effect and other preventive services identified as preventive services mandates (legislation or regulatory), the service may be identified by adding 53 to the procedure. For separately reported services specifically identified as preventive, the modifier should not be used.
- 57 Anesthesia by Surgeon:** Regional or general anesthesia provided by the surgeon may be reported by adding modifier 57 to the basic service. (This does not include local anesthesia.) **Notes:** Modifier 57 would not be used as a modifier for the anesthesia procedure.
- 58 Extended Procedure:** When a service identified in the listing, bilateral procedure, that can be performed at the same session, should be identified by adding modifier 58 to the appropriate 5 digit code.
- 59 Multiple Procedures:** When multiple procedures, other than E/M services, (Physical Medicine and Rehabilitation services or provision of supplies

(e.g., cast(s)), are performed at the same session as the same individual, the primary procedure or service may be reported as listed. The additional procedure(s) or service(s) may be identified by appending modifier 59 to the additional procedure or service listing. **Notes:** This modifier should not be appended to designated "add-on" codes (see Appendix 2).

- 50 Reduced Services:** Under certain circumstances, a service or procedure is partially reduced or discontinued at the direction of the physician or other qualified health care professional. Under these circumstances the service provided can be identified by the usual procedure number and the addition of modifier 50, signifying that the service is reduced. This provides a means of reporting actual service without denoting the discontinuation of the basic service. **Notes:** For hospital outpatient reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC, hospital outpatient unit).
- 51 Discontinued Procedure:** Under certain circumstances, the physician or other qualified health care professional may elect to terminate a surgical or diagnostic procedure. Due to extenuating circumstances or those that threaten the well-being of the patient, it may be necessary to indicate that a surgical or diagnostic procedure was started but discontinued. This circumstance may be reported by adding modifier 51 to the code reported by the individual for the discontinued procedure. **Notes:** This modifier is not used to report the discontinuation of a procedure prior to the patient's anesthesia induction and/or surgical preparation in the operating suite. For outpatient hospital/ambulatory surgery center (ASC) reporting of a previously scheduled procedure/service that is partially reduced or cancelled as a result of extenuating circumstances or those that threaten the well-being of the patient prior to or after administration of anesthesia, see modifiers 73 and 74 (see modifiers approved for ASC, hospital outpatient unit).
