

**Table 3. Coloured zone for escalation of care**

Coloured Zones	Escalation of care
Yellow Zone	If a patient's observations are noted in the yellow zone, then it is stipulated that a Registered Nurse (RN) has to review the individual. The frequency of observations also needs to be increased. If there are three or more observations noted in this coloured zone, then an escalation to the next level is required.
Red Zone	If a patient's observations are noted in the red zone, then a review by the multi-disciplinary team (MDT) is required. This team has to have at least one medical officer and one RN. Again, the frequency of observations must be increased. Three or more observations noted in this coloured zone must be escalated to the next level.
Purple Zone	If a patient's observations are noted in any of the purple zone, then a medical emergency response is required. This is where clinical staff with advanced life support skills will be called to help. At this stage, the senior doctor responsible for that patient must also be notified. If the patient is not transferred, then the frequency of the observations must be increased until they return to their normal parameters, unless end-of-life plan or modification has been initiated. <sup>31</sup>
