

### White's plans

1. If White castles long, then he will assault Black's kingside with h2-h4-h5, and then attempt a mating attack along the h-file.
2. If White castles short, then he will play a central strategy, place a rook on the d-file and a knight on d5.

### Black's plans

1. If White castles long, then Black must create a queenside attack at all costs. Black will often play along the c-file as well as push his a- and b-pawns. An exchange sacrifice ... $\text{Bxc3}$ , with the idea of doubling pawns, is often possible.
2. If White castles short, then Black can play a more positional game along the c-file. Place a knight on c4, and again the idea of an exchange sacrifice with ... $\text{Bxc3}$  may be possible.

### The Dragon Formation

The Dragon Formation arises almost exclusively from the Dragon or Accelerated Dragon lines of the Sicilian. It may also occur with reversed colours when White plays the English Opening and Black replies with 1...c5 followed by 2... $\text{Qf6}$  and 3...d5. Assuming we have the structure with colours the usual way around (say, from a Dragon) then Black almost always castles short while White must choose whether to castle short or long. This decision has a significant influence on the character of the resulting game.

Something to note about White's Plan 2 is that if Black captures the knight on d5 with a piece, and White recaptures with  $\text{exd5}$ , then the structure is very similar to the asymmetric transformation of the Maroczy, which we studied in Chapter 11.

After such a brief overview, many readers may wonder if the infamous Dragon is really *that simple*. The truth is that this structure often yields extremely complex positions, but the complexity is mostly tactical. There are few strategic elements to discuss, as most games are decided by brutal tactical shots. This is the reason I decided not to give a separate chapter to this structure. Nevertheless, one interesting idea in this structure is Black's exchange sacrifice on c3, and we will see an example of it.
