Coburn, Mary Kay Stein, 2010-04-16 That there is a divide between research and practice is a common lament across policy-oriented disciplines and education is no exception. Rhetoric abounds about the role research plays or does not play in the improvement of schools and classrooms and policy makers push solutions that are rooted in assumptions about the way that research should influence practice. Yet few people have studied the relationship between research and practice empirically. This book presents findings from a series of interlocking case studies of nationally visible R D projects with a unique focus on how researchers and practitioners actually worked together and the policy social and institutional processes that either enabled or hindered their work. The book investigates the dynamics of cross-institutional collaboration and the relationship between tool design teacher learning and the implementation of research-based approaches. It also explores conditions for learning in schools and the role of evidence in district decision making. By investigating the roles played by research and practice in these ten educational improvement efforts, the book illuminates lessons for those who seek to do this kind of work in the future. It concludes by suggesting implications for designers funders school and district leaders and universities The SAGE Handbook of Curriculum, Pedagogy and Assessment Dominic Wyse, Louise Hayward, Jessica Pandya, 2015-12-03 The research and debates surrounding curriculum pedagogy and assessment are ever growing and are of constant importance around the globe. With two volumes containing chapters from highly respected researchers whose work has been critical to understanding and building expertise in the field, The SAGE Handbook of Curriculum Pedagogy and Assessment focuses on examining how curriculum is treated and developed and its impact on pedagogy and assessment worldwide.
