

Unit 4: The Constitutional Convention

STUDY GUIDE

In this unit, we will learn about the conflict and compromises between the Federalists and the Anti-Federalists as they strive to replace the Articles of Confederation with the new U.S. Constitution.

The Declaration of Independence Review

In 1776, during the American Revolutionary War, Thomas Jefferson wrote a historical document called, "The Declaration of Independence."

The Declaration of Independence was a list of grievances against King George III of Great Britain.

The colonists used this document to explain the reasons why they wanted to overthrow an oppressive government and separate from Great Britain.

The Articles of Confederation Review

In 1777, the Continental Congress wrote another document called, "The Articles of Confederation." The Articles of Confederation (AOC) was the document that united the 13 colonies (now called independent states).

The AOC also served as a written constitution that established roles and responsibilities for the new American government.

The 13 independent states wanted the AOC to be a governing document that would serve as the framework for a new American government. As a result, the AOC represented the loose confederation system of states and successfully limited the power of the central government (the highest level of government for the Americans).

Most of the government's power was given to governments at the state level because the Continental Congress feared a strong central government would lead to tyranny (government abuse).

The Continental Congress fought against tyranny during the American Revolution and didn't want to see a repeat of the same problems about taxes, representation, individual rights, and civil liberties. As a result, the Articles of Confederation was designed to have very important strengths and very important limitations.

Strengths of the Articles of Confederation (AOC)

According to the AOC, the central government had the power to declare war and negotiate treaties. Also, every state had the power to establish a small militia and coin currency (print money). The AOC protected Americans by not allowing the country to have a national executive. A national executive is a person who rules a country, such as a president, or king.

The AOC also protected America by not allowing the country to have a national judiciary. A national judiciary is the naming one group of judges for all of the people in America. The lack of a national executive and the lack of a national judiciary prevented the central government from becoming too powerful. The Continental Congress added these limitations to the government because they were trying to create a new government that would not abuse citizens' rights.
