Constructing Autism Unravelling The Truth And Understanding The Social:

Constructing Autism Majia Holmer Nadesan, 2013-09-05 This book examines the historical and social events that enabled autism to be identified as a distinct disorder in the early twentieth century

Representing Autism Stuart Fletcher Murray, 2008-06-01 From concerns of an autism epidemic to the MMR vaccine crisis autism is a source of peculiar fascination in the contemporary media Discussion of the condition has been largely framed within medicine psychiatry and education but there has been no exploration of its power within representative narrative forms *Representing Autism* is the first book to tackle this approach using contemporary fiction and memoir writing film photography drama and documentary together with older texts to set the contemporary fascination with autism in context *Representing Autism* analyses and evaluates the place of autism within contemporary culture and at the same time examines the ideas of individual and community produced by people with autism themselves to establish the ideas of autistic presence that emerge from within a space of cognitive exceptionality Central to the book is a sense of the legitimacy of autistic presence as a way by which we might more fully articulate what it means to be human

War on Autism Anne McGuire, 2016-05-10 *War on Autism* examines autism as a historically specific and powerladen cultural phenomenon that has much to teach about the social organization of a neoliberal western modernity Bringing together a variety of interpretive theoretical perspectives including critical disability studies queer and critical race theory and cultural studies the book analyzes the social significance and productive effects of contemporary discourses of autism as these are produced and circulated in the field of autism advocacy Anne McGuire discusses how in the field of autism advocacy autism often appears as an abbreviation its multiple meanings distilled to various red flag warnings in awareness campaigns bulleted biomedical facts in information pamphlets or worrisome statistics in policy reports She analyzes the relationships between these fragmentary enactments of autism and traces their continuities to reveal an underlying powerful and ubiquitous logic of violence that casts autism as a pathological threat that advocacy must work to eliminate Such logic McGuire contends functions to delimit the role of the good autism advocate to one who is positioned against autism

Towards an Ethic of Autism Kristien Hens, 2021-07-07 Kristien Hens succeeds in weaving together experiential expertise of both people with autism and their parents scientific insights and ethics and does so with great passion and affection for people with autism with or without mental or other disabilities In this book she not only asks pertinent questions but also critically examines established claims that fail to take into account the criticism and experiences of people with autism Sam Peeters author of *Autistic Gelukkig Garant* 2018 and *Gedurfde vragen Garant* 2020 blog *Tistje.com* What does it mean to say that someone is autistic *Towards an Ethics of Autism* is an exploration of this question and many more In this thoughtful wide ranging book Kristien Hens examines a number of perspectives on autism including psychiatric biological and philosophical to consider different ways of thinking about autism as well as its meanings to those who experience it those who diagnose it and those who research it Hens delves into the history of autism and its

roots in the work of Leo Kanner and Hans Asperger to inform a contemporary ethical analysis of the models we use to understand autism today She explores the various impacts of a diagnosis on autistic people and their families the relevance of disability studies the need to include autistic people fully in discussions about and research on autism and the significance of epigenetics to future work on autism Hens weaves together a variety of perspectives that guide the reader in their own ethical reflections about autism Rich accessible and multi layered this is essential reading for philosophers educational scientists and psychologists who are interested in philosophical ethical questions related to autism but it also has much to offer to teachers allied health professionals and autistic people themselves Worlds of Autism Joyce Davidson, Michael Orsini, 2013-11-01 Since first being identified as a distinct psychiatric disorder in 1943 autism has been steeped in contestation and controversy Present day skirmishes over the potential causes of autism how or even if it should be treated and the place of Asperger s syndrome on the autism spectrum are the subjects of intense debate in the research community in the media and among those with autism and their families Bringing together innovative work on autism by international scholars in the social sciences and humanities Worlds of Autism boldly challenges the deficit narrative prevalent in both popular and scientific accounts of autism spectrum disorders instead situating autism within an abilities framework that respects the complex personhood of individuals with autism A major contribution to the emerging interdisciplinary field of critical autism studies this book is methodologically and conceptually broad Its authors explore the philosophical questions raised by autism such as how it complicates neurotypical understandings of personhood grapple with the politics that inform autism research treatment and care investigate the diagnosis of autism and the recognition of difference and assess representations of autism and stories told by and about those with autism From empathy social circles and Internet communities to biopolitics genetics and diagnoses Worlds of Autism features a range of perspectives on autistic subjectivities and the politics of cognitive difference confronting society s assumptions about those with autism and the characterization of autism as a disability Contributors Dana Lee Baker Washington State U Beatrice Bonniau Paris Descartes U Charlotte Brownlow U of Southern Queensland Australia Kristin Bumiller Amherst College Brigitte Chamak Paris Descartes U Kristina Chew Saint Peter s U New Jersey Patrick McDonagh Concordia U Montreal Stuart Murray U of Leeds Majia Holmer Nadesan Arizona State U Christina Nicolaidis Portland State U Lindsay O Dell Open U London Francisco Ortega State U of Rio de Janeiro Mark Osteen Loyola U Maryland Dawn Eddings Prince Dora Raymaker Sara Ryan U of Oxford Lila Walsh *The Autism Matrix* Gil Eyal, 2013-08-26 Today autism has become highly visible Once you begin to look for it you realize it is everywhere Why We all know the answer or think we do there is an autism epidemic And if it is an epidemic then we know what must be done lots of money must be thrown at it detection centers must be established and explanations sought so that the number of new cases can be brought down and the epidemic brought under control But can it really be so simple This major new book offers a very different interpretation The authors argue that the recent rise in autism should be understood

an aftershock of the real earthquake which was the deinstitutionalization of mental retardation in the mid 1970s This entailed a radical transformation not only of the institutional matrix for dealing with developmental disorders of childhood but also of the cultural lens through which we view them It opened up a space for viewing and treating childhood disorders as neither mental illness nor mental retardation neither curable nor incurable but somewhere in between The authors show that where deinstitutionalization went the furthest as in Scandinavia UK and the blue states of the US autism rates are also highest Where it was absent or delayed as in France autism rates are low Combining a historical narrative with international comparison The Autism Matrix offers a fresh and powerful analysis of a condition that affects many parents and children today

Deviant Behavior Erich Goode,2019-04-23 Deviant Behavior offers an engaging and wide ranging discussion of deviant behavior beliefs and conditions It examines how the society defines labels and reacts to whatever and whoever falls under this stigmatizing process thereby providing a distinctly sociological approach to the phenomenon The central focus in defining what and who is deviant is the audience members of the influential social collectivities that determine the outcome of this process The discussion in this volume encompasses both the explanatory or positivist approach and the constructionist or labeling perspectives thereby lending a broad and inclusive vista on deviance The central chapters in the book explore specific instances or forms of deviance including crime substance abuse and mental disorder all of which share the quality that they and their actors believers or bearers may be judged by these influential parties in a negative or derogatory fashion And throughout Deviant Behavior the author emphasizes that to the sociologist the term deviant is completely non pejorative no implication of inferiority or inherent stigma is implied what the author emphasizes is that specific members of the society social circles or collectivities define and treat certain parties in a derogatory fashion the sociologist does not share in this stigmatizing process but observes and describes it

Autism and Representation Mark Osteen,2010-04-26 Autism a neuro developmental disability has received wide but often sensationalistic treatment in the popular media A great deal of clinical and medical research has been devoted to autism but the traditional humanities disciplines and the new field of Disability Studies have yet to explore it This volume the first scholarly book on autism in the humanities brings scholars from several disciplines together with adults on the autism spectrum to investigate the diverse ways that autism has been represented in novels poems autobiographies films and clinical discourses and to explore the connections and demarcations between autistic and neurotypical creativity Using an empathetic scholarship that unites professional rigor with experiential knowledge derived from the contributors lives with or as autistic people the essays address such questions as In what novel forms does autistic creativity appear and what unusual strengths does it possess How do autistic representations whether by or about autistic people revise conventional ideas of cognition creativity language disability and sociability This timely and important collection breaks new ground in literary and film criticism aesthetics psychology and Disability Studies

Neurodiversity Studies Hanna Rosqvist,Nick Chown,Anna Stenning,2020-06-02 Building on work in feminist studies queer studies and

critical race theory this volume challenges the universality of propositions about human nature by questioning the boundaries between predominant neurotypes and others including dyslexics autistics and ADHDers This is the first work of its kind to bring cutting edge research across disciplines to the concept of neurodiversity It offers in depth explorations of the themes of cure prevention eugenics neurodivergent wellbeing cross neurotype communication neurodiversity at work and challenging brain bound cognition It analyses the role of neuro normativity in theorising agency and a proposal for a new alliance between the Hearing Voices Movement and neurodiversity In doing so we contribute to a cultural imperative to redefine what it means to be human To this end we propose a new field of enquiry that finds ways to support the inclusion of neurodivergent perspectives in knowledge production and which questions the theoretical and mythological assumptions that produce the idea of the neurotypical Working at the crossroads between sociology critical psychology medical humanities critical disability studies and critical autism studies and sharing theoretical ground with critical race studies and critical queer studies the proposed new field neurodiversity studies will be of interest to people working in all these areas Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Sociological Reflections on the Neurosciences Martyn Pickersgill, Ira Van Keulen, 2012-07-30 The neurosciences are more than a collection of scientific practices they offer up various ways of thinking about mind body and society This title casts light on the place role and impact of neuroscience It reflects on the insights the neurosciences have to offer sociology

Learning Disability and Inclusion Phobia C. F. Goodey, 2015-10-05 The social position of learning disabled people has shifted rapidly over the last 20 years from long stay institutions first into community homes and day centres and now to a currently emerging goal of ordinary lives for individuals using person centred support and personal budgets These approaches promise to replace a century and a half of scientific pathological models based on expert assessment and of the accompanying segregated social administration which determined how and where people led their lives and who they were This innovative volume explains how concepts of learning disability intellectual disability and autism first came about describes their more recent evolution in the formal disciplines of psychology and shows the direct relevance of this historical knowledge to present and future policy practice and research Goodey argues that learning disability is not a historically stable category and different people are considered learning disabled as it changes over time Using psychological and anthropological theory he identifies the deeper lying pathology as inclusion phobia in which the tendency of human societies to establish an in group and to assign out groups reaches an extreme point Thus the disability we call intellectual is a concept

essential only to an era in which to be human is essentially to be deemed intelligent autonomous and capable of rational choice Interweaving the author's historical scholarship with his practice based experience in the field Learning Disability and Inclusion Phobia challenges myths about the past as well as about present day concepts exposing both the historical continuities and the radical discontinuities in thinking about learning disability **Epigenetics and Responsibility** Emma Moormann, Anna Smajdor, Daniela Cutas, 2024-01-25 EPDF and EPUB available Open Access under CC BY NC ND licence This volume brings together an international team of contributors to provide a much needed examination of climate litigation in Africa The book outlines how climate litigation in Africa is distinct as well as pinpointing where it connects with the global conversation Chapters engage with crucial themes such as human rights approaches to climate governance corporate liability and the role of gender in climate litigation **50 Years after Deinstitutionalization** Brea L. Perry, 2016-07-28 This volume will examine deinstitutionalization's legacies approximately 50 years after reintegration began It will highlight pressing issues around mental health treatment social and health policy and the lived experiences of those coping with mental illness that were or continue to be significantly influenced by deinstitutionalization reforms Governmentality Studies in Education, 2009-01-01 Michel Foucault's concept of governmentality originated in a lecture series in the late 1970s at the Collège de France and soon became the basis for a range of historical and contemporary studies across the social sciences and humanities The concept in part rests on a simple but powerful idea that links government to the freedom of the subject in a novel understanding of liberal politics It also provides an analytics of power based on the examination of actual practices This is the first collection to use Foucault's concept in relation to the field of education where it has a natural home given that much educational theory and practice in the liberal tradition at least since Kant has been directed at the goals of autonomy and self government The volume has three sections a general section on Foucault and governmentality with contributions from some of the world's leading scholars in the area including Colin Gordon Jacques Donzelot and Thomas Lemke and two sections devoted to governmentality and education the first outlining Anglo American perspectives the second focusing on European perspectives with contributions from leading scholars such as Tom Popkewitz James Marshall Tom Osborne Michael Peters Mark Olssen Tina Besley Hermann J Forneck Bernadette Baker Susan Weber Susanne Maurer Linda Graham and Maarten Simons and Jan Masschelein among many others Medicine and Empathy in Contemporary British Fiction Anne Whitehead, 2017-07-05 A comprehensive and critical overview of the field of intercultural communication Autistic Company Ruud Hendriks, 2012 Social interactions of autistic and non autistic persons are intriguing In all sorts of situations people with autism are part of the daily life of those around them Such interactions exist despite the lack of familiar ways of attuning to one another In Autistic Company the anthropologist and philosopher Ruud Hendriks himself trained as a care worker for young people with autism investigates what alternative means are sometimes found by autistic and non autistic people to establish a shared existence Unprecedented in scholarly work on autism the book

also reflects on how to talk about these unusual ways of getting on together Drawing on methods from both the arts and the social sciences this study covers very diverse sources ranging from literary works to factual writing on autism in science and advisory literature and from autobiographical accounts to ethnographic observations in a home for autistic people Putting familiar concepts to a test Autistic Company wrenches and fiddles with the very distinctions that constitute our sense of self By doing so Hendriks succeeds in getting closer both to autistic and non autistic extremes showing how thin the division between us and them really is L W Nauta in *Krisis*

Broken Beauty Joseph N. Straus, 2018-05-01 Preeminent music theorist and leader in the study of music and disability Joseph Straus presents a truly groundbreaking take on musical modernism demonstrating in an expansive and vivid multimedia presentation that modernist music is inextricably entwined with attitudes toward disability In *Broken Beauty* Straus argues that the most characteristic features of musical modernism fractured forms immobilized harmonies conflicting textural layers radical simplification of means in some cases and radical complexity and hermeticism in others can be understood as musical depictions of disability conditions including deformity disfigurement mobility impairment madness idiocy and autism Against the traditional medical model of disability which sees it as a bodily defect requiring diagnosis and normalization or cure this new sociocultural model of disability sees it as cultural artifact something that is created by and creates culture Straus places this revised model of disability against a wide range of canonical high art concert music from the first decades of the century through the 1950s *Broken Beauty* illustrates how disability is right at the core of musical modernism it is one of the things that musical modernism is fundamentally about
