Constructing Translation Competence Lodz Studies In Language:

Constructing Translation Competence Paulina Pietrzak, Mikołaj Deckert, 2015 The volume provides current methodological insights into translation didactics It investigates both theoretical and practical aspects of translator training with a view to exchanging knowledge and resources among those who contribute to the complex and challenging endeavour of constructing translation competence The Role of Theory in Translator Training Daniela Di Mango, 2018-11-26

Translation study programs have always been torn between the expectations placed on them to provide students with a comprehensive education at an academic level but at the same time to prepare them for the demands of the professional translation market There is furthermore an ongoing debate about a supposed gap between translation theory and practice Several often opposing claims have been put forward concerning the usefulness of theory to professionals and students and how and when to best implement theoretical courses in translation curricula The aim of this book is to provide an overview of the different opinions and expectations that have been put forward in the literature and to test some of these claims empirically on student subjects who have been trained with either a practical or a theoretical focus on translation It thus gives insights into the role of both theoretical and practical aspects in translator training and the ways in which each of them can contribute to the development of translation competence *Translation Education* Junfeng Zhao, Defeng Li, Lu
