## **Consciousness Intent And The Structure Of The Universe:**

**Consciousness, Intent, and the Structure of the Universe** Jeffrey Keen, 2005 A ground breaking book which challenges accepted beliefs by proving with scientific precision that consciousness involves more than just your brain and actually depends on the very fabric of the Universe Is this book the missing link that some scientists have been reluctant to accept Jeffrey Keen explores consciousness and its relation to the universe This book is the culmination of years of research work by Keen who has identified observed and measured universal energy fields that have not previously been detected either by the usual five senses or by existing scientific instruments Through his pioneering discoveries this book unquestionably demonstrates and explains the ancient mystery of dowsing and its connection to the cosmos Evidence is provided that there exists a universally pervading Information Field which is the current front runner in the evolution of understanding consciousness The book demonstrates that because the brain readily interacts with the Information Field there is a link between consciousness intent and the structure of the Universe quantum theory and other topics currently being researched in Physics All of the above has been achieved by using the orthodox scientific approach of involving geometry numbers universal constants ratios and measurement It is shown that the conscious mind extends over vast distances and is much more than just a physical brain within a skull The above interpretations of experimental results have fundamental significance This changes the way we see the Universe and should gradually produce a paradigm shift in the way we think comparable to us no longer believing that the Sun goes round the Earth in spite of it appearing to be obvious These are indeed exciting times

**The Intention Experiment** Lynne McTaggart, 2008-02-05 Draws on original experiments as well as scientific research to explore a theory that the entire universe is connected by a vast energy field that can be manipulated for the betterment of the world using positive thought processes

*The Mind's Interaction with the Laws of Physics and Cosmology* Jeffrey S Keen, 2019-01-14 This ground breaking book is about the emerging academic and practical study of subtle energies which historically have not been easy to detect The unique experiments numerous measurements and resulting data presented here have been collected over 30 years of research The findings have resulted from pioneering discoveries leading to equations graphs universal constants formulae and laws of nature that eventually connect to cosmology and the structure of the universe The book proves with high scientific and mathematical precision that consciousness involves more than just the brain but actually depends on the very fabric of the universe Some of the discoveries prove that certain information can be communicated across the solar system not only faster than light but instantaneously The book deals with the entanglement of large objects and the fact that the cosmos possesses a universal consciousness Also shown is that the mind can detect information from the outer planets and identifies connections to a five dimensional universe and the mysterious recently discovered dark energy This text will be of interest to the considerable number of people worldwide involved in similar studies These include researchers at universities and colleges currently or

wishing to teach and develop this up and coming subject non professionals and members of relevant academic societies

*The Vibrational Matrix* Manhiel Marthin, 2025-03-11 This book represents a profound journey into understanding the fundamental mechanisms through which our reality is constructed Its content introduces us to a revolutionary perspective in which consciousness emerges as the primordial element shaping the universe we experience The work meticulously explores how every thought emotion and action acts as a vibration that influences the very fabric of existence Through quantum principles and universal vibrational laws it reveals how our perceptions and beliefs shape not only our personal reality but also the collective one One of the most profound aspects of the book is its explanation of how vibrational frequencies interact and intertwine creating patterns that give rise to what we perceive as physical reality This transformative understanding allows us to glimpse the inherent power we possess to consciously shape our world The text delves into fundamental concepts such as universal interconnectedness the vibrational nature of matter and energy and the crucial role intention plays in manifesting reality These ideas challenge our traditional understanding of the physical world and invite us to expand our perception beyond conventional boundaries

**Transcending the Speed of Light** Marc Seifer, 2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of

this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe

*Consciousness Mattering* Peter D. Hershock, 2023-12-14 Consciousness Mattering presents a contemporary Buddhist theory in which brains bodies environments and cultures are relational infrastructures for human consciousness Drawing on insights from meditation neuroscience physics and evolutionary theory it demonstrates that human consciousness is not something that occurs only in our heads and consists in the creative elaboration of relations among sensed and sensing presences and more fundamentally between matter and what matters Hershock argues that without consciousness there would only be either unordered sameness or nothing at all Evolution is consciousness mattering Shedding new light on the co emergence of subjective awareness and culture the possibility of machine consciousness the risks of algorithmic consciousness hacking and the potentials of intentionally altered states of consciousness Hershock invites us to consider how freely wisely and compassionately consciousness matters

*The Romance of Reality* Bobby Azarian, 2022-06-28 Why do we exist For centuries this question was the sole province of religion and philosophy But now science is ready to take a seat at the table According to the prevailing scientific paradigm the universe tends toward randomness it functions according to laws without purpose and the emergence of life is an accident devoid of meaning But this bleak interpretation of nature is currently being challenged by cutting edge findings at the intersection of physics biology neuroscience and information theory generally referred to as complexity science Thanks to a new understanding of evolution as well as recent advances in our understanding of the phenomenon known as emergence a new cosmic narrative is taking shape Nature's simplest parts come together to form ever greater wholes in a process that has no end in sight In *The Romance of Reality* cognitive neuroscientist Bobby Azarian explains the science behind this new view of reality and explores what it means for all of us In engaging accessible prose Azarian outlines the fundamental misunderstanding of thermodynamics at the heart of the old assumptions about the universe's evolution and shows us the evidence that suggests

that the universe is a self organizing system one that is moving toward increasing complexity and awareness Cosmologist and science communicator Carl Sagan once said of humanity that we are a way for the cosmos to know itself The Romance of Reality shows that this poetic statement in fact rests on a scientific foundation and gives us a new way to know the cosmos along with a riveting vision of life that imbues existence with meaning nothing supernatural required **Human and the 5th Dimension (Volume 3)** Prof. Dr. Bilal Semih Bozdemir, Human and the 5th Dimension What is the 5th Dimension The Concept of Dimensions Dimensions in Space and Time The Fourth Dimension Time Theories of the Fifth Dimension String Theory and the Fifth Dimension The Implications of a Fifth Dimension Seeing Beyond the 3D World Accessing Higher Dimensional Awareness The Spiritual Significance of the 5th Dimension Transcending the Physical Realm Exploring Parallel Universes Unlocking the Mysteries of Consciousness Quantum Entanglement and the 5th Dimension Non Locality and Instantaneous Connections The Holographic Universe Theory Embracing Multi Dimensional Perspectives Expanding our Sensory Perception Intuition and the 5th Dimensional Consciousness The Shift in Human Evolution Elevating our Vibrations and Frequencies The Power of Intention and Manifestation Tapping into the Universal Energy Grid Aligning with the Divine Blueprint The Journey of Self Realization Merging the Physical and Spiritual Realms Revelations and Epiphanies Transcending the Ego and Duality Accessing Higher Dimensional Guidance The Importance of Mindfulness and Meditation Integrating the 5th Dimensional Awareness Practical Applications of 5th Dimensional Living Healing and Transformation Manifesting Abundance and Prosperity Enhancing Creativity and Innovation Fostering Compassion and Unity Expanding Consciousness and Perception Connecting with the Cosmic Intelligence The Road Ahead Embracing the 5th Dimension Conclusion The Dawn of a New Era *Inventing God* Jon Mills, 2016-07-22 In this controversial book philosopher and psychoanalyst Jon Mills argues that God does not exist and more provocatively that God cannot exist as anything but an idea Put concisely God is a psychological creation signifying ultimate ideality Mills argues that the idea or conception of God is the manifestation of humanity's denial and response to natural deprivation a self relation to an internalized idealized object the idealization of imagined value After demonstrating the lack of any empirical evidence and the logical impossibility of God Mills explains the psychological motivations underlying humanity's need to invent a supreme being In a highly nuanced analysis of unconscious processes informing the psychology of belief and institutionalized social ideology he concludes that belief in God is the failure to accept our impending death and mourn natural absence for the delusion of divine presence As an alternative to theistic faith he offers a secular spirituality that emphasizes the quality of lived experience the primacy of feeling and value inquiry ethical self consciousness aesthetic and ecological sensibility and authentic relationality toward self other and world as the pursuit of a beautiful soul in search of the numinous *Inventing God* will be of interest to academics scholars lay audiences and students of religious studies the humanities philosophy and psychoanalysis among other disciplines It will also appeal to psychotherapists psychoanalysts and mental health professionals focusing on the integration

**A Plausible God** Mitchell Silver,2009-08-25 A philosopher of religion examines contemporary conceptions of God through close readings of three modern Jewish thinkers For centuries the traditional God of Judaism Christianity and Islam has been under pressure to conform to the scientific worldview giving rise to a liberal conception of God compatible with a naturalism For many this liberal new God is the only credible God But is it a useful God Does belief in so malleable a deity come from or lead to different political moral psychological or aesthetic phenomena from atheism A Plausible God evaluates the new God by analyzing the theology of three recent Jewish thinkers Mordechai Kaplan Michael Lerner and Arthur Green and compares faith in the new God to disbelief in any gods Mitchell Silver reveals what is at stake in the choice between naturalistic liberal theology and a nontheistic naturalism without gods Silver poses the question If it is to be either the new God or no God what does what should determine the choice Although Jewish thinkers are used as the primary exemplars of new God theology Silver explores developments in contemporary Christian thought Eastern religious traditions and New Age religion A Plausible God constitutes a significant contribution to current discussions of the relationship between science and religion as well as to discussions regarding the idea of God itself in modern life

**Life and Process** Spyridon A. Koutroufinis,2014-05-21 Alfred North Whitehead is arguably the most original 20th century philosopher of nature and metaphysics In recent decades a number of physicists have produced ground breaking new theories in fundamental physics influenced by his process philosophy In contrast few biologists are even aware that Whitehead s radical rethinking of the Cartesian assumptions implicit in 19th century sciences might be relevant to their enterprise This book seeks to fill this gap by exploring how Whitehead s process ontology might provide a new philosophical foundation for the biosciences of the 21st century The central premise shared by all of the volume s authors is the idea that all living processes are irreducible processes Each chapter focuses on assumptions implicit in some of the core concepts of biology such as organism evolution information and teleology that play crucial explanatory roles in the biosciences but as metaphysical concepts fall outside its purview The authors each identify important shortcomings implicit in contemporary biological paradigms and show how an approach grounded in a process oriented metaphysics can avoid them
