Constructing Worlds Alona Pardo, Elias Redstone, 2014 **Constructing Worlds** Alona Pardo, Elias Redstone, David Campany, 2014 Photography and Architecture in the Modern Age The relationship between architecture and photography is the focus of this book that features the work of eighteen influential artists from the 1930s to the present day Architecture has long been a subject matter for photographers who utilize the medium not just to document the built world but also to reveal wider truths about society This book features chapters devoted to various artists among them Berenice Abbott Walker Evans Ed Ruscha Bernd and Hilla Becher Andreas Gursky and Iwan Baan and includes 220 colour and duotone images Each chapter opens with a text introducing the artists work followed by reproductions of their photographs Arranged chronologically the book documents the birth of the skyscraper against the backdrop of the Great Depression the rise of the modernist tradition in America post colonial Africa and India the effects of industry on 1960s Europe the increasing suburbanization of America and Europe and the consequences of today s mass urbanization in Asia the Middle East and South America Far reaching and penetrating this volume reflects on the ongoing dialogue between photography and architecture AUTHOR Alona Pardo is an Associate Curator at Barbican Art Gallery in London She has curated numerous projects at the Barbican as well as at the South London Gallery and the Austrian Cultural Forum in London Elias Redstone is the author of *Shooting Space Architecture in Contemporary Photography* and the curator of *Archizines* He has served as a curator of the Architecture Foundation in London the London Festival of Architecture and the Polish Pavilion at the Venice Architecture Biennale David Campany is a writer and curator His books include *Walker Evans The Magazine Work* *Gasoline* *Jeff Wall Picture for Women* *Photography and Cinema* and *Art and Photography* 220 illustrations *Constructing Worlds* Alona Pardo, Elias Redstone, 2014 Architecture has long been a subject matter for photographers who utilize the medium not just to document the built world but also to reveal wider truths about society This book features chapters devoted to various artists among them Berenice Abbott Walker Evans Ed Ruscha Bernd and Hilla Becher Andreas Gursky and Iwan Baan and includes 220 color and duotone images Each chapter opens with a text introducing the artists work followed by reproductions of their photographs Arranged chronologically the book documents the birth of the skyscraper against the backdrop of the Great Depression the rise of the modernist tradition in America post colonial Africa and India the effects of industry on 1960s Europe the increasing suburbanization of America and Europe and the consequences of today s mass urbanization in Asia the Middle East and South America Far reaching and penetrating this volume reflects on the ongoing dialogue between photography and architecture 00Exhibition Barbican Art Gallery London UK 25 9 2014 11 1 2015 *The Routledge Companion to Urban Imaginaries* Christoph Lindner, Miriam Meissner, 2018-09-28 The Routledge Companion to Urban Imaginaries delves into examples of urban imaginaries across multiple media and geographies from new visions of smart eco and resilient cities to urban dystopias in popular culture from architectural renderings of starchitecture and luxury living to

performative activism for new spatial justice and from speculative experiments in urban planning fiction and photography to augmented urban realities in crowd mapping and mobile apps The volume brings various global perspectives together and into close dialogue to offer a broad interdisciplinary and critical overview of the current state of research on urban imaginaries Questioning the politics of urban imagination the companion gives particular attention to the role that urban imaginaries play in shaping the future of urban societies communities and built environments Throughout the companion issues of power resistance and uneven geographical development remain central Adopting a transnational perspective the volume challenges research on urban imaginaries from the perspective of globalization and postcolonial studies inviting critical reconsiderations of urbanism in its diverse current forms and definitions In the process the companion explores issues of Western centrism in urban research and design and accommodates current attempts to radically rethink urban form and experience This is an essential resource for scholars and graduate researchers in the fields of urban planning and architecture art media and cultural studies film visual and literary studies sociology and political science geography and anthropology

Photography for Architects Martine Hamilton Knight, 2024-01-19 Shortlisted for the Architectural Book Awards 2024 We live in a world driven by images but with so much visual noise is anyone really looking How does an architect ensure their portfolio is within view of the right audience Photographs are still as vital to architectural practice as they ever were However creation and circulation once in the hands of skilled professionals is now perceived as being free and within easy reach of all But where is the clarity What is the message By setting out the case for curated image making considered photography may again be placed at the centre of architectural marketing strategies Photography for Architects guides the reader through various topics from establishing a visual brand and sharing images online to producing content in house and commissioning professionals It explores the still and moving image creating books and exhibitions for legacy value compiling award entries and engaging with trade press Little understood aspects regarding legal rights and obligations ethics copyright and licensing images for use are discussed in clear language Multiple photographic examples and conversations with international practitioners highlight the various themes throughout Written by a working architectural photographer whose life has been spent in commercial practice this easy to read richly illustrated guide is essential reading for architects and designers alike who are working with images and image makers

Visioning Technologies Graham Cairns, 2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural

forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world

Riverine Gerald Adler,Manolo Guerci,2018-10-29 Riverscapes are the main arteries of the world s largest cities and have for millennia been the lifeblood of the urban communities that have developed around them These human settlements given life through the space of the local waterscape soon developed into ritualised spaces that sought to harness the dynamism of the watercourse and create the local architectural landscape Theorised via a sophisticated understanding of history space culture and ecology this collection of wonderful and deliberately wide ranging case studies from Early Modern Italy to the contemporary Bengal Delta investigates the culture of human interaction with rivers and the nature of urban topography Riverine explores the ways in which architecture and urban planning have imbued cultural landscapes with ritual and structural meaning **Beyond the Architect's Eye** Mary N. Woods,2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium s power to depict

how the past jostled the present In *Beyond the Architect's Eye* Mary N Woods expands on this range of images through a rich analysis that commingles art amateur and documentary photography genres usually not considered architectural but that often take the built environment as their subject Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II when urban and rural areas grew further apart in the face of skyscrapers massive industrialization and profound cultural shifts Central to this study is the work of Alfred Stieglitz Frances Benjamin Johnston and Marion Post Wolcott but Woods weaves a wider narrative that also includes Alice Austen Gertrude Kasebier Berenice Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old South crystallized in photographs like Johnston's a New South shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach *Beyond the Architect's Eye* is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography

Temples for a Modern God Jay M. Price, 2012-11-02 *Temples for a Modern God* is one of the first major studies of American religious architecture in the postwar period and it reveals the diverse and complicated set of issues that emerged just as one of the nation's biggest building booms unfolded Jay Price tells the story of how a movement consisting of denominational architectural bureaus freelance consultants architects professional and religious organizations religious building journals professional conferences artistic studios and specialized businesses came to have a profound influence on the nature of sacred space Debates over architectural style coincided with equally significant changes in worship practice Meanwhile suburbanization and the baby boom required a new type of worship facility one that had to attract members and serve a social role as much as honor the Divine Price uses religious architecture to explore how Mainline Protestantism Catholicism Judaism and other traditions moved beyond their ethnic regional and cultural enclaves to create a built environment that was simultaneously intertwined with technology and social change yet rooted in a fluid and shifting sense of tradition Price argues that these structures as often mocked as loved were physical embodiments of a significant if underappreciated era in American religious history

Building Desire George Dodds, 2005-08-08 An in depth look at the unique Barcelona Pavilion its many and complex identities through history and its enduring appeal

The Building News and Engineering Journal, 1925

[A World History of Art](#) Hugh Honour, John Fleming, 2005 Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's

artistic heritage From our paleolithic past to our digitised present every continent and culture is covered in an articulate and well balanced discussion In this Seventh Edition the text has been revised to embrace developments in archaeology and art historical research while the renowned contemporary art historian Michael Archer has greatly expanded the discussion of the past twenty years providing a new perspective on the latest developments The insight elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations half of which are now in colour These images together with the numerous maps and architectural plans have been chosen to represent the most significant chronological regional and individual styles of artistic expression **Building World** ,1907 NorCalMod Pierluigi Serraino,2006-08-03 Many people think modernist architecture never flowered in California north of the San Fernando Valley NorCalMod dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs As a style modernist architecture was hotly debated in its day why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed pulling heavyweights such as Frank Lloyd Wright Lewis Mumford and Walter Gropius into the fray Ultimately that existing Bay Region Style would remain the area s architectural hallmark but not before hundreds of important modernist projects many still standing yet unjustly neglected today had been established The remarkable photos in this book open our eyes to a long lost chapter in the history of California architecture and make NorCalMod a volume to be enjoyed by those interested in California history and style as well as by architecture students and professionals
