Community Engagement in Higher Education W. James Jacob, Stewart E. Sutin, John C. Weidman, John L. Yeager, 2015-06-17 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local national and international levels But what is community engagement Even if this interest is genuine and widespread there are many different concepts of community service outreach and engagement The wide range of activity encompassed by community engagement suggests that a precise definition of the community mission is difficult and organizing and coordinating such activities is a complex task This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it Contributors provide empirical research findings including several case study examples that respond to the following higher education community engagement issues What is the community and what

does it need and expect from higher education institutions Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities technical universities community colleges or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally competent researchers and professionals How can a university be global and at the same time locally relevant Is it or should it be left to the institutions to determine the scope and mode of their community engagement or is a state mandate preferable and feasible If community engagement or community service are mandatory what are the consequences of not complying with the mandate How effective are policy mandates and university engagement for regional and local economic development What are the principal features and relationships of regionally engaged universities Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it or should it be made mandatory for both faculty and students How can community engagement be better integrated with the other two traditional missions of the university research and teaching Cover image The Towering Four fold Mission of Higher Education by Natalie Jacob

Audience Genre Expectations in the Age of Digital Media Leo W. Jeffres, David J. Atkin, Kimberly A.

Neuendorf, 2022-12-05 This volume bridges the divide between film and media studies scholarship by exploring audience expectations of film and TV genre in the age of digital streaming using qualitative thematic and quantitative data driven analyses Through four ground breaking surveys of audience members and content creators the authors have empirically determined what audiences expect of various genres the extent to which these definitions match those of scholars and critics and the overall variation and complexity of audience expectations in the age of media abundance They also examine audience habits and preferences drawing from both theory and original empirical analyses with a view toward the implications for the moving image in a rapidly changing media environment The book draws from the data to develop a number of new concepts including genre repertoire genre hybridity audience interest maximization and variety seeking and a new stage of genre development genre bending It is an ideal resource for students and scholars interested in the symbiotic relationship between audiences and the moving image products they consume as well as the way the current digital media environment has impacted our understanding of film and TV genres *Anywhere Working and the New Era of Telecommuting* Blount,

Connected Minds Technology and Today's Learners OECD, 2012-07-23 This book contributes to the debate about the effects of technology attachment and connectedness on today's learners and their expectations about teaching

Media/theory Shaun Moores, 2005 Media Theory is an accessible yet challenging guide to thinking about media and communications in modern life Shaun Moores connects the analysis of media and communications with key themes in contemporary social theory Time Space Relationships Meanings and Experiences He insists that media studies are not simply about studying media Rather they require an understanding of how technologically mediated communication is bound up with wider processes in the modern world from the reproduction of social life on an everyday basis to the reorganization of social relations on a global scale Drawing on ideas from a range of disciplines in the humanities and social sciences Media Theory makes a distinctive contribution towards rethinking the shape and direction of media studies today *Industrial Revolution 4.0* Stanisław Mazur, 2022-09-28 The radical transformations to which the economy and society have been subjected for decades have gained momentum in recent years not least because of the coronavirus pandemic the consequences of which are yet to be fully understood As a result certain economic models and business practices are becoming less sustainable One of the reasons for this is the rapid advance of Revolution 4.0 The issues raised in this book are central to understanding the theoretical and practical aspects of the Fourth Industrial Revolution and its overwhelming impact on emerging socio economic relations The book addresses the future and flexibility of the labour market in the era of digital transformation issues related to the emergence of new patterns of production and the distribution of public services It examines the impact of Revolution 4.0 on the global business services sector and business project management models in times of increasing complexity The book covers a broad spectrum of concerns associated with Industry 4.0 such as social economic technological and environmental making it a comprehensive resource offering state of the art knowledge Further it includes a discussion on the perspectives for the development of Revolution 4.0 in the context of the post pandemic world This book skillfully combines theoretical considerations with practical applications offering a valuable engaging and accessible resource for researchers scholars students policymakers public decision makers and businesspeople alike

Reclaiming Information and Communication Technologies for Development Tim Unwin, 2017-05-18 The development of new Information and Communication Technologies ICTs has transformed the world over the last two decades

These technologies are often seen as being inherently good with the ability to make the world better and in particular to reduce poverty. However, their darker side is frequently ignored in such accounts. ICTs undoubtedly have the potential to reduce poverty for example by enhancing education, health delivery, rural development and entrepreneurship across Africa, Asia and Latin America. However, all too often projects designed to do so fail to go to scale and are unsustainable when donor funding ceases. Indeed, ICTs have actually dramatically increased inequality across the world. The central purpose of this book is to account for why this is so and it does so primarily by laying bare the interests that have underlain the dramatic expansion of ICTs in recent years. Unless these are fully understood, it will not be possible to reclaim the use of these technologies to empower the world's poorest and most marginalised.

100 Years of Radio in South Africa, Volume 2
 Sisanda Nkoala, Gilbert Motsaathebe, 2023-12-27 The book brings together media scholars and practitioners to deliberate on the role and influence of radio broadcasting in South Africa over the past 100 years. The publication will add to the existing body of knowledge on radio in this context by being among one of the few to consider radio broadcasting in South Africa. Essentially, the book will make a distinct contribution focusing on a critique of the medium's role in community building and culture making among others. While the book will provide relevant theoretical frameworks, it also aims to include the voices of media practitioners who can reflect on the importance of this medium from a more realistic perspective. Volume 2 focuses on the impact of digitization on radio in South Africa and considers the future of radio in South Africa.

Information and Communication Technologies for Development. Strengthening Southern-Driven Cooperation as a Catalyst for ICT4D
 Petter Nielsen, Honest Christopher Kimaro, 2019-04-26 The two volumes IFIP AICT 551 and 552 constitute the refereed proceedings of the 15th IFIP WG 9.4 International Conference on Social Implications of Computers in Developing Countries (ICT4D 2019) held in Dar es Salaam, Tanzania, in May 2019. The 97 revised full papers and 2 short papers presented were carefully reviewed and selected from 185 submissions. The papers present a wide range of perspectives and disciplines including but not limited to public administration, entrepreneurship, business administration, information technology for development, information management systems, organization studies, philosophy and management. They are organized in the following topical sections: communities, ICT-enabled networks and development, digital platforms for development, ICT for displaced population and refugees, How it helps, How it hurts, ICT4D for the indigenous by the indigenous and of the indigenous, local technical papers, pushing the boundaries, new research methods, theory and philosophy in ICT4D, southern-driven, human-computer interaction, sustainable ICT, informatics, education and learning in a turbulent world, doing the safari way.

Conversation Analysis and Sociological Theory
 Melisa Stevanovic, David Inglis, Anssi Peräkylä, Emmi Koskinen, 2024-08-22 The relations between Conversation Analysis (CA), sociology and social theory are complex, often ambiguous and have sometimes been rather fraught. While there might be some relatively high level of agreement amongst their practitioners on what CA is, what it does and what it is meant to achieve, that is not so much the case for the more open and broad terrains of sociology and social theory.

Moreover each of the domains in question has changed in orientation composition and academic location since CA first came into existence in the late 1960s While initially a child of sociology as CA has matured and extended its substantive and methodological reach it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines notably linguistics anthropology and psychology It is now no longer at all clear how CA relates to sociology and social theory what each side currently does or what it could bring to the other in the future
