Theorizing Built

Form and Culture Kapila D. Silva, Nisha A. Fernando, 2024-03-08 In this collection of essays *Theorizing Built Form and Culture: The Legacy of Amos Rapoport* a felicitation volume to celebrate the significance of Professor Amos Rapoport's lifelong scholarship scholars from around the world discuss the analytical relevance, expansion and continuing application of these contributions in developing an advanced understanding of mutual relationships between people and built environments across cultures. Professor Amos Rapoport has espoused an intellectual and theoretical legacy on environmental design scholarship that explains how cultural factors play a significant role in the ways people create and use environments as well as the way environments in turn influence people's behavior. This volume presents a hitherto not seen unique and singular work that simultaneously articulates a cohesive framework of Rapoport's architectural theories and demonstrates how that theoretical approach be used in architectural inquiry, education and practice across environmental scales, types and cultural contexts. It also acknowledges for the very first time how this theoretical legacy has pioneered the decolonizing of the Eurocentric approaches to architectural inquiry and has thus privileged an inclusive cross cultural perspective that laid the groundwork to understand and analyze non-Western design traditions. The book thus reflects a wide range of cross cultural and cross contextual range to which Professor Rapoport's theories apply a general notion of theoretical validity he always advocated for in his own writings. The volume is a paramount source for scholars and students of architecture who are interested in understanding how culture mediates the creation, use and preservation of the built environment. *The City Reader* Richard T. LeGates, Frederic Stout, 2003 This third edition juxtaposes the very best publications on the city. It reflects the latest thinking on globalization, information technology and urban theory. It is a comprehensive mapping of the terrain of urban studies, old and new. *Leadership in Architectural Research* Hazem Rashed-Ali, Shelley Roff, 2009

Community-Built Katherine Melcher, Barry Stiefel, Kristin Faurest, 2016-11-25 Throughout history and around the world community members have come together to build places, be it settlers constructing log cabins in nineteenth century Canada, an artist group creating a waterfront gathering place along the Danube in Budapest or residents helping revive small town main streets in the United States. What all these projects have in common is that they involve local volunteers in the construction of public and community places; they are community built. Although much attention has been given to specific community built movements such as public murals and community gardens, little has been given to defining community built as a whole. This volume provides a preliminary description of community built practices with examples from the disciplines of urban design, historic preservation and community art. Taken as a whole, these community built projects illustrate how the process of local involvement in adapting, building and preserving a built environment can strengthen communities and create places that are intimately tied to local needs, culture and community. The lessons learned from this volume can provide community planners, grassroots facilitators and participants with an understanding of what can lead to successful community built art, construction, preservation and placemaking.
