Anthropology Christoph Wulf,2013-04-08 Originally published in German Christoph Wulf s Anthropology sets its sights on a topic as ambitious as its title suggests anthropology itself Arguing for an interdisciplinary and intercultural approach to anthropology that incorporates science philosophy history and many other disciplines Wulf examines with breathtaking scope all the ways that anthropology has been understood and practiced around the globe and through the years Seeking a central way to understand anthropology in the midst of many different approaches to the discipline Wulf concentrates on the human body An emblem of society culture and time the body is also the result of many mimetic processes the active acquisition of cultural knowledge By examining the role of the body in the performance of rituals gestures language and other forms of imagination he offers a bold new look at how culture is produced handed down and transformed Drawing such examinations into a comprehensive and sophisticated assessment of the discipline as a whole Anthropology looks squarely at the mystery of humankind and the ways we have attempted to understand it

Companion to Medicine in the Twentieth Century Roger Cooter,John Pickstone,2016-02-01 During the twentieth century medicine has been radically transformed and powerfully transformative In 1900 western medicine was important to philanthropy and public health but it was marginal to the state the industrial economy and the welfare of most individuals It is now central to these aspects of life Our prospects seem increasingly depe

Companion to Science in the Twentieth Century John Krige,Dominique Pestre,2003 This work on science in the 20th century represents work in America Europe and Asia It includes such topics as the countries that have made the most significant contributions the relationship between science and industry and the importance of instrumentation

Jesus and Identity Markus Cromhout,2010-02-25 New Testament scholarship lacks an overall interpretive framework in which to understand Judean identity This lack of interpretive framework is quite acute in scholarship on the historical Jesus where the issue of Judeanness Jewishness is moststrongly debated A socio cultural model of Judean ethnicity is developed being a synthesis of 1 Sanders notion of covenantal nomism 2 Berger and Luckmann s theories on the sociology of knowledge 3 Dunn s four pillars of Second Temple

Judaism and his new perspective on Paul 4 cultural or social anthropology in the form of modern ethnicity theory and lastly 5 Duling's Socio Cultural Model of Ethnicity The proposed model is termed Covenantal Nomism It is a pictorial representation of the Judean symbolic universe which as an ethnic identity is proposed to be essentially primordialist The model is given appropriate content by investigating what would have been typical of first century Judean ethnic identity It is also argued that there existed a fundamental continuity between Judea and Galilee as Galileans were ethnic Judeans themselves and they lived on the ancestral land of Israel Attention is lastly focused on the matter of ethnic identity in Q The Q people were given an eschatological Judean identity based on their commitment to Jesus and the requirements of the kingdom of God *The Seductions of Darwin* Matthew Rampley, 2017-01-12 The surge of evolutionary and neurological analyses of art and its effects raises questions of how art culture and the biological sciences influence one another and what we gain in applying scientific methods to the interpretation of artwork In this insightful book Matthew Rampley addresses these questions by exploring key areas where Darwinism neuroscience and art history intersect Taking a scientific approach to understanding art has led to novel and provocative ideas about its origins the basis of aesthetic experience and the nature of research into art and the humanities Rampley's inquiry examines models of artistic development the theories and development of aesthetic response and ideas about brain processes underlying creative work He considers the validity of the arguments put forward by advocates of evolutionary and neuroscientific analysis as well as its value as a way of understanding art and culture With the goal of bridging the divide between science and culture Rampley advocates for wider recognition of the human motivations that drive inquiry of all types and he argues that our engagement with art can never be encapsulated in a single notion of scientific knowledge Engaging and compelling *The Seductions of Darwin* is a rewarding look at the identity and development of art history and its complicated ties to the world of scientific thought **Being Alive** Tim Ingold, 2021-11-29 Anthropology is a disciplined inquiry into the conditions and potentials of human life Generations of theorists however have expunged life from their accounts treating it as the mere output of patterns codes structures or systems variously defined as genetic or cultural natural or social Building on his classic work *The Perception of the Environment* Tim Ingold sets out to restore life to where it should belong at the heart of anthropological concern *Being Alive* ranges over such themes as the vitality of materials what it means to make things the perception and formation of the ground the mingling of earth and sky in the weather world the experiences of light sound and feeling the role of storytelling in the integration of knowledge and the potential of drawing to unite observation and description Our humanity Ingold argues does not come ready made but is continually fashioned in our movements along ways of life Starting from the idea of life as a process of wayfaring Ingold presents a radically new understanding of movement knowledge and description as dimensions not just of being in the world but of being alive to what is going on there This edition includes a new preface by the author *A Dialectical Journey through Fashion and Philosophy* Eun Jung Kang, 2020-01-01 This book takes an in depth look at the integration of fashion and

philosophy It challenges the deeply rooted prejudice or misconception that fashion is a field limited to body oriented and appearance related themes and practices It also reveals that fashion is intermeshed with distinctively modern issues that belong to the realm of the mind as well as the body In doing so it refashions philosophy and philosophizes fashion which ultimately amount to the same thing The book argues that while the philosophization of fashion can give a clearer understanding of some esoteric areas of philosophy and fashion s close connection to modern societies and politics it also shows that philosophy can assist in redeeming fashion from the objective bodily world positioning it as an indispensable part of the humanities This is because fashion manifests critical aspects of human culture in our time and is an expression of the zeitgeist which is interwoven with the unfolding of history This book will be highly relevant to students and researchers in fashion studies who are looking for the theoretical underpinnings and insights for their own work It will also be of keen interest to scholars in the field of philosophy who are seeking to apply philosophical concepts to both everyday life and our empirical world
