An Introduction to Comparative Law Theory and Method

Geoffrey Samuel, 2014-12-01 This short book on comparative law theory and method is designed primarily for postgraduate research students whose work involves comparison between legal systems. It is accordingly a book on research methods although it will also be of relevance to all students undergraduate and postgraduate taking courses in comparative law and to academics entering the field of comparison. The substance of the book has been developed over many years of teaching general theory of comparative law primarily on the European Academy of Legal Theory programme in Brussels but also on other programmes in French Belgian and English universities. It is arguable that there has been to date no single introductory work exclusively devoted to comparative law methodology and thus this present book aims to fill this gap.

The Method and Culture of Comparative Law Maurice Adams, Dirk Heirbaut, 2014-12-01 Awareness of the need to deepen the method and methodology of legal research is only recent. The same is true for comparative law by nature a more adventurous branch of legal research which is often something researchers simply do whenever they look at foreign legal systems to answer one or more of a range of questions about law whether these questions are doctrinal economic sociological etc. Given the diversity of comparative research projects the precise contours of the methods employed or the epistemological issues raised by them are to a great extent a function of the nature of the research questions asked. As a result the search for a unique one size fits all comparative law methodology is unlikely to be fruitful. That however does not make reflection on the method and culture of comparative law meaningless. Mark Van Hoecke has throughout his career been interested in many topics but legal theory comparative law and methodology of law stand out. Building upon his work this book brings together a group of leading authors working at the crossroads of these themes the method and culture of comparative law. With contributions by Maurice Adams John Bell Joxerramon Bengoetxea Roger Brownsword Sen Patrick Donlan Rob van Gestel and Hans Micklitz Patrick Glenn Jaap Hage Dirk Heirbaut Jaakko Husa Souichirou Kozuka and Luke Nottage Martin Lhng Susan Millns Toon Moonen Francois Ost Heikki Pihlajamki Geoffrey Samuel Mathias Siems Jrm yrehagen Sunde Catherine Valcke and Matthew Grellette Alain Wijffels.

Bauknecht,Branisław Sitek,Jakub J. Szczerbowski,2014-07-24 Comparative law is a research methodology which has been increasingly fashionable in recent decades as comparisons between common law and civil law have dominated the law studies landscape There are many methods of comparative law in use including comparison of legal rules comparison of cases and comparison of legal theories Each of these methods has strong proponents and opponents Dogmatic comparisons of rules are criticized for not giving the whole picture of law in action but praised for being the first and the only truly legal step in comparative research Case based comparisons are praised for enabling us to compare the true understanding of rules by courts yet the critics of this method point out that only the higher courts decisions are subject to comparison and most cases do not reach this stage Finally comparisons of legal theories are praised for enabling us to know the spirit of the laws yet opponents would argue that many countries sharing the same theory would draw opposite conclusions from it This book is a result of the attempted and successful introduction of comparative law into the region of Eastern and Central Europe The subject has induced interest beyond expectations This volume opens with a chapter on the unification of law both from the perspective of institutional unification by such supra state organizations spontaneous and institutionalized unifications between two or more legal systems and the methods of choosing the right rules in the unification process Chapters two and three follow the classical division of private and public law as proposed by the brilliant Roman lawyer Ulpian Overall the chapters in this book offer an interesting and engaging commentary on the current topics discussed by academics in Eastern and Central Europe *Comparative Law and Multicultural Legal Classes: Challenge or Opportunity?* Csaba Varga,2020-07-30 This book
