Understanding FDI-Assisted Economic Development Sanjaya Lall, Rajneesh Narula, 2013-09-13 It is nowadays well accepted that both economic growth and development are highly dependent on improving not just the availability of capital but also access to technological capabilities infrastructure and resources This has gone hand in hand with an increasing economic liberalization of most developing countries The role of the MNE as a viable source of both capital and technology is one of the key features of this new openness In the process of embracing FDI as a solution to the myriad of economic ills something even the World Bank has begun to do little attempt is made to understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research

Ideas and Innovation in East

Asia Albert Hu, *Multinationals and Economic Growth in East Asia* Shujiro Urata, Chia Siow Yue, Fukunari Kimura, 2006-11-22 Developing countries in East Asia recorded remarkable economic growth until the Asian financial crisis erupted in mid 1997. Although several countries experienced devastating setbacks, most of them recovered to achieve reasonable rates of economic growth over the next few years. Sound macroeconomic management, export-oriented policies, and the availability of skilled and low wage labour are among the factors that contributed to the rapid economic growth before the crisis and the recovery thereafter. Especially noteworthy in this regard is the role played by foreign direct investment (FDI). This comprehensive book identifies the factors that contributed to the expansion of FDI inflows in East Asia and the factors that enabled recipient countries to utilize FDI effectively. It includes detailed case studies on China, South Korea, Taiwan, Indonesia, Malaysia, the Philippines, Singapore, Thailand, and Vietnam. Also included is a comparative study of investing firms headquartered in the United States, Japan, and Hong Kong. The authors conclude that social stability, clear and effective policy implementation, and corporate governance are all key factors in reaping economic success from FDI.

An East Asian Renaissance Indermit Singh Gill, Homi J. Kharas, Deepak Bhattasali, 2007 An East Asian Renaissance by a World Bank team led by Chief Economist for East Asia Pacific Dr Homi Kharas and Economic Adviser Dr Indermit Gill is the first comprehensive analysis of the new forces and challenges at play in the region since the Bank's seminal report of 1993, *The East Asian Miracle*. The report argues that regional flows of goods, finance, and technology are helping even smaller East Asian countries reap the benefits of economies of scale and that this regional integration must be encouraged. But it also points out that these measures have to be supported by actions at the domestic level to ease the stresses and strains that rapid economic growth leaves in its wake. East Asia must now turn to the urgent domestic challenges of inequality, social cohesion, corruption, and environmental degradation arising from its economic success.

Asian Development Experience Vol1 Hirohisa Kohama, 2004-01-19 This book investigates the effects of Japan's foreign aid for development, trade, and FDI in ASEAN economies from various perspectives, including the historical implications of Japan's involvement, agricultural exports, the development patterns of the Southeast Asian economies, the formation of international production and distribution networks, poverty reduction, upgrading technology, and industrial agglomeration. The contributors analyse trade, FDI, and foreign aid from the standpoint of policy coherence at the interface between development co-operation and many other policy areas: trade, agriculture, food safety, fisheries, intellectual property, the environment, international finance, tax policy, migration, and peace and security.

The East Asian High-tech Drive Yunpeng Zhu, Hal Hill, 2006-04-26 East Asia has been an area of high economic growth for several decades. *The East Asian High Tech Drive* argues that to maintain the growth momentum, the more advanced East Asian economies need to pay particular attention to policies designed to upgrade their industrial capabilities. The authors argue that effectively functioning institutions, predictable commercial policies, investments in human capital, and infrastructure openness and macroeconomic stability are essential for growth and technological development.

Regarding the two lower income economies in the sample Indonesia is found to have the smallest improvement in the skill intensity of its exports while the Philippines has registered the slowest economic growth For both countries industrial upgrading issues are not as imperative as achieving or regaining rapid labour intensive growth as both recently experienced major political instabilities

Institutional Change in Southeast Asia Fredrik Sjöholm, José Tongzon, 2004-11-05 Includes a comprehensive analysis of different countries in the region Contributors include experts from the region and Europe The Asian economic crisis and its aftermath is a huge area of study so this book will appeal to a broad market
