Catt, 2017-09-22 Communicology is widely accepted on the international scene as a new name for the study of human communication It replaces several equivocal disciplinary conceptions such as communication which may fail to distinguish the science of communication from its object of investigation or the message centered communication studies which often obfuscates information exchange with the experience of shared meaning in human encounters Communicology differs from the American mainstream social science of communication not only because it is grounded in communication theory rather than information theory but also because it advances a philosophically informed ecological perspective on human discourse This book is intended as a contribution to the philosophy of communication and the human science of communicology Semiotic phenomenology is thoroughly described as the synthetic logic that combines a philosophy of consciousness with a science of culture and conduct to explicate the lifeworld habitus Consciousness is viewed as cultural semiotic and experience as personal phenomenological This is a reciprocal reflexive relationship in which culture is conceived as consciousness of communication and communication the manifest experience of culture The book describes embodiment so conceived including the history of the matrix idea in American pragmatism and European philosophy as they commingled in the United States to produce a unique discipline of communication the science of embodied discourse Important roots of this new discipline are described for the first time here in a unique synthesis of C S Peirce John Dewey Gregory Bateson and Pierre Bourdieu In addition the semiotic relativity hypothesis is argued to be an important implication of this new discipline Transcending the stale debate on language and thought the limited conception of linguistic relativity is considerably broadened and deepened The distinctive lifeworld of humans is argued to occur at the threshold of sign consciousness in the

semiotic matrix of culture society person Semiotic phenomenology is not only a synthesis of two great European philosophical movements structuralism and phenomenology it is also the essence of American pragmatism This view culminates in the contemporary human science of communicology

New Understandings of Twin Relationships Barbara Klein, Stephen A. Hart, Jacqueline M. Martinez, 2020-12-23 New Understandings of Twin Relationships takes an experience based approach to exploring how twin attachment and estrangement are critical to understanding the push and pull of closely entwined personal relationships Based on the research expertise of each of the authors all identical twins in their own right and vignettes from twins across the globe this book describes the inner workings of the twin world showing how the twin world creates experiences that are often more intense and intricately textured than those in the singleton world

Chapters debunk myths surrounding twinship and analyze the developmental stages of the twin relationship as well as the effect of being a twin on one's mental health from different perspectives. The authors articulate how attachment, separation, anxiety, loneliness, estrangement, and the subjective experience of the twin and non-twin other impact behavior, thinking, and feeling. Through its careful study of the many psychological challenges that twins face throughout their lifetime, this text will help psychologists, scholars, clinicians, and twins themselves attain a deeper understanding of all interpersonal relationships.

In-Between Mariana Ortega, 2016-03-14 This original study intertwining Latina feminism, existential phenomenology, and race theory offers a new philosophical approach to understanding selfhood and identity. Focusing on writings by Gloria Anzaldúa, María Lugones, and Linda Martín Alcoff, Mariana Ortega articulates a phenomenology that introduces a conception of selfhood as both multiple and singular. Her Latina feminist phenomenological approach can account for identities belonging simultaneously to different worlds, including immigrants, exiles, and inhabitants of borderlands. Ortega's project forges new directions not only in Latina feminist thinking on such issues as borders, mestizaje, marginality, resistance, and identity politics, but also connects this analysis to the existential phenomenology of Martin Heidegger and to such concepts as being in the world, authenticity, and intersubjectivity. The pairing of the personal and the political in Ortega's work is illustrative of the primacy of lived experience in the development of theoretical understandings of who we are. In addition to bringing to light central metaphysical issues regarding the temporality and continuity of the self, Ortega models a practice of philosophy that draws from work in other disciplines and that recognizes the important contributions of Latina feminists and other theorists of color to philosophical pursuits.

Twin Dilemmas Barbara Klein, 2017-06-26 The development of how twins relate to each other and their single partners is explored through life stories and clinical examples in this telling study of twin interconnections. While the quality of a nurturing family life is crucial, Dr. Klein has found there are often issues with separation, anxiety, loneliness, competition with each other, and finding friendships outside of twinship. When twin lives are entwined because of inadequate parenting and estrangement, twin loss is possible and traumatic, creating a crippling fear of expansiveness, an inability to be yourself. Therapists and twins seeking an understanding of twin relationships will find this clinically compelling book a valuable resource.
