

## Block and Point-by-Point Comparison (In Block Format)

The compare and contrast essay is used to compare all sorts of things on any number of points. A common example is two items compared on three points, such as the movies *Star Wars* and *Avatar* compared on their visuals, stories, and soundtracks. People often wonder how to organize the comparison of their points. There are two typical formats: Block and Point-by-Point. Because of the ways Block and Point-by-Point differ in the format of their paragraphs, the organization of their comparisons, and how detailed they are, Block Format is good for creating shorter and less detailed essays, while Point-by-Point is better for writing more complex essays.

In the body of the essay (ignoring introduction and conclusion), **Block Format** presents its comparison and contrast in two or more paragraphs depending on how many items are being compared and contrasted to each other. In the example of any *two* movies being compared, no matter how many points of comparison there are between each movie, a Block Format essay would have *two* body paragraphs, one for each movie. Then Block Format **organizes** the information in an uneven way: in the *first* body paragraph, the first item is described on all three of the comparison points without actually comparing it to the second item. In the *second* body paragraph, Block Format describes the second item *only* by comparing it to the first. This can make Block Format essays less **detailed** because covering so many points in each paragraph can leave less room for well-developed analysis.

In comparison to Block Format, Point-by-Point **Format** requires more paragraphs. This format requires paragraphs based on the points of comparison instead of on the items being compared, so an essay with *three* points of comparison between two items will have *three* body paragraphs, not two. No matter how many items are being compared, the number of *paragraphs* will always be the number of *points*. In contrast, with Block Format, *two* items would mean *two* paragraphs, no matter how many comparison points were covered. Also, Point-by-Point Format **organizes** information in a more equal way than Block Format because it compares all items equally, one point at a time, repeating the process from paragraph to paragraph until all points have been fully
