Angola Africa do Sul Vietnam China Paquistão Índia Austrália e Japão Comparing Canada Martin Papillon, Luc Turgeon, Jennifer Wallner, Stephen White, 2014-09-15 Debating how Canada compares both regionally and in relation to other countries is a national pastime This book examines how political scientists apply diverse comparative strategies to better understand Canadian political life Using a variety of methods the contributors use comparison to examine topics as diverse as Indigenous rights Canadian voting behaviour activist movements climate policy and immigrant retention While the theoretical perspectives and kinds of questions asked vary greatly as a whole they demonstrate how the art of comparing is an important strategy for understanding Canadian identity politics political mobilization political institutions and public policy Ultimately this book establishes how adopting a more systematic comparative outlook is essential not only to revitalize the study of Canadian politics but also to achieve a more nuanced understanding of Canada as a whole Encyclopedia of Government and Politics Mary Hawkesworth, Maurice Kogan, 2013-11-07 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers **Disciplines, Disasters and Emergency Management** David A. McEntire, 2007 Disasters such as the 9 11 terrorist attacks the Indian Ocean Tsunami and Hurricane Katrina illustrate the salience and complexity of disasters Both scholars and practitioners therefore agree that we must take a more proactive and holistic approach to emergency management which should logically be derived from a sound understanding of the academic literature and the most pressing concerns facing professionals in the field today Disciplines Disasters and Emergency Management reviews what is known about catastrophic events from the standpoint of various academic areas of study The introduction Security 2.0 Charles Hauss, 2015-09-28 Today international security issues are slowly being reconsidered through the lens of human security which refers to a combination of political economic social nutritional environmental physical health and personal safety issues When first mentioned in 1994 the concept of human security represented a significant first step in understanding that security dilemmas could no longer be seen as purely geopolitical phenomena that revolve around the nation state This book explains the progress made toward human security since then and the steps that remain to be taken to achieve it fully It begins by addressing how the nation state is both the source and the solution of security problems in the world before demonstrating how the meaning of security

itself is being reconsidered and traditional approaches are being challenged Building on the concept of human security the book looks at how we are slowly moving toward large scale political and social change It argues that it is time for a security 2 0 approach different from the traditional models of national security Thus Security 2 0 addresses new challenges and their political responses pointing toward alternatives to what is referred to as permanent war It highlights such themes as cooperation the multi dimensionality of security issues and the continuing pressures towards democratization global markets and multilevel governance and how these contribute today to make a safer world Further it shows how environmental threats global corporations identity issues and international regimes such as the EU are also fostering a fundamental rethinking of the concept of security Including a variety of perspectives and written in a jargon free accessible manner the work will provide students with new insights on conflict processes and international security Our Enemies and US Ido Oren,2003 Oren reveals the fervently pro German views of the founder of the discipline John W Burgess who stated that the Teutonic race was politically superior to all others and he presents evidence of a long term intimate relationship between the discipline and the national security agencies of the U S government BOOK JACKET **Guarding the Guardians** Mathurin C. Hounnikpo,2016-04-22 The relationship between civil society and the armed forces is an essential part of any polity democratic or otherwise because a military force is after all a universal feature of social systems Despite significant progress moving towards democracy among some African countries in the past decade all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military This book explores the theory of civil military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre colonial and colonial eras before examining contemporary armies and their impact on society Furthermore it revisits the various explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force Whether as a revolutionary force as a stabilizing force or as a modernizing force the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations The performance of Africa s military governments since independence however has soundly disproven this thesis As such this study conveys the necessity of new civil military relations in Africa and calls not just for civilian control of the military but rather a democratic oversight of the security forces in Africa Human Resources and Their Development - Volume I Michael J. Marquardt,2009-10-20 Human Resources and their Development is a component of Encyclopedia of Human Resources Policy Development and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Human Resources and their Development provides the essential aspects and a myriad of issues of great relevance to our world such as Human Resources and their Development Major Issues in Human Resource Development Elements of Planning Strategies for Human Resource Development Human Life Systems Diversity and Human Development Human Development and Causes of Global Change Consequences of Global

Change for Human Resource Development These two volumes are aimed at the following five major target audiences
University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and
Decision Makers and NGOs *Complex Democracy* Volker Schneider, Burkard Eberlein, 2015-05-26 This book presents a
state of the art collection of original contributions on democracy addressing three related themes the complexity of modern
democracies and their structural diversity coping strategies of democracies in times of crises and current and potential
trajectories and transformations of democracy The first part of the book maps the democratic landscape by revealing the
diversity of democratic political systems through either comparative analysis or case studies on the specific nature of
political and administrative systems in interest intermediation and identity construction The second part presents articles
that investigate the response of democracies to times of crisis with an emphasis on political economies and policy processes
within the European Union The third part offers studies on democracies that explore their adaptive potential in the context of
globalization and in that of broader technical institutional or cultural changes
