Profiling Discourse Participants Barbara De Cock, 2014-08-15 The construction of discourse is a challenging field where many discourse structures and interactional effects remain poorly understood This analysis provides a systematic explanation for the way in which discourse participants speaker and hearer are construed in Spanish through a corpus driven analysis of informal conversation TV debates and parliamentary debates It deals not only with person deixis but with the full range of possibilities speakers choose from when profiling their self or their relationship with the interlocutor This analysis also offers new insights into the operationalization of the concepts of subjectivity and intersubjectivity as tools for the analysis of person reference and genre comparison The comparative and corpus driven approach offers methodological tools for genre analysis that can be transposed to other languages and or genres The detailed description of three socially highly relevant discourse types from a cognitive functional perspective makes this book a useful resource not only for pragmatists but also for researchers in political and media discourse
