Disordered Semiconductors Marc A. Kastner, Stadford R. Ovshinsky, Gordon A. Thomas, 2012-12-06 Twenty four years ago Hellmut Fritzsche came to our laboratory to evaluate our work in amorphous materials He came many times sometimes bringing his violin to play with our youngest son to talk to help to discover and to teach The times with him were always exciting and rewarding There was a camaraderie in the early years that has continued and a friendship that has deepened among Iris and me and Hellmut Sybille and their children The vision that Hellmut Fritzsche shared with me the many

important contributions he made the science that he helped so firmly to establish the courage he showed in the time of our adversity and the potential that he recognized put all of us in the amorphous field not only his close friends and collaborators in his debt He helped make a science out of intuition and played an important role not only in the experimental field but also in the basic theoretical aspects It has been an honor to work with Hellmut through the years Physics of Disordered Materials David Adler, 2012-12-06 This volume and its two companion volumes entitled Tetrahedrally Bonded Amorphous Semiconductors and Localization and Metal Insulator Transitions are our way of paying special tribute to Sir Nevill Mott and to express our heartfelt wishes to him on the occasion of his eightieth birthday Sir Nevill has set the highest standards as a physicist teacher and scientific leader Our feelings for him include not only the respect and admiration due a great scientist but also a deep affection for a great human being who possesses a rare combination of outstanding personal qualities We thank him for enriching our lives and we shall forever carry cherished memories of this noble man Scientists best express their thanks by contributing their thoughts and observations to a Festschrift This one honoring Sir Nevill fills three volumes with literally hundreds of authors meeting a strict deadline The fact that contributions poured in from all parts of the world attests to the international cohesion of our scientific community It is a tribute to Sir Nevill's stand for peace and understanding transcending national borders The editors wish to express their gratitude to Ghazaleh Koefod for her diligence and expertise in deciphering and typing many of the papers as well as helping in numerous other ways The blame for the errors that remain belongs to the editors
