## **Distributed Multimedia Databases Techniques And Applications:**

**Distributed Multimedia Databases: Techniques and Applications** Shih, Timothy K.,2001-07-01 In the last few years we have observed an explosive growth of multimedia computing communication and applications This revolution is transforming the way people live work and interact with each other and is impacting the way business government services education entertainment and healthcare are operating Yet several issues related to modeling specification analysis and design of distributed multimedia database systems and multimedia information retrieval are still challenging to both researchers and practitioners Distributed Multimedia Databases Techniques and Applications points out these challenges and provides valuable suggestions toward the necessary solutions by focusing on multimedia database techniques

Distributed Multimedia Databases Timothy K. Shih,2003 Multimedia application techniques used in contexts as diverse as business government education entertainment and healthcare are continually challenged by modeling specification analysis and design issues that affect distributed multimedia database systems These challenges are analyzed and practical solutions are offered in this scholarly discussion of database techniques such as image retrieval video abstraction video database and multimedia and multistream synchronization The most recent research findings are presented to facilitate effective database management Video Data Management and Information Retrieval Sagarmay Deb,2005-01-01 This book combines the two important areas of research within computer technology and presents them in comprehensive easy to understand manner Ideal for graduates and under graduates as well as researchers working in either video data management or information retrieval it takes an in depth look at many relevant topics within both video data management and information retrieval In addition to dissecting those issues it also provides a big picture view of each topic

**Multimedia Database Management Systems** B. Prabhakaran,1996-10-31 Multimedia Database Management Systems presents the issues and the techniques used in building multimedia database management systems Chapter 1 provides an overview of multimedia databases and underlines the new requirements for these applications Chapter 2 discusses the techniques used for storing and retrieving multimedia objects Chapter 3 presents the techniques used for generating metadata for various media objects Chapter 4 examines the mechanisms used for storing the index information needed for accessing different media objects Chapter 5 analyzes the approaches for modeling media objects both their temporal and spatial characteristics Object oriented approach with some additional features has been widely used to model multimedia information The book discusses two systems that use object oriented models OVID Object Video Information Database and Jasmine The models for representing temporal and spatial requirements of media objects are then studied The book also describes authoring techniques used for specifying temporal and spatial characteristics of multimedia databases Chapter 6 explains different types of multimedia queries the methodologies for processing them and the language features for describing them The features offered by query languages such as SQL MM Structured Query Language for Multimedia

PICQUERY and Video SQL are also studied Chapter 7 deals with the communication requirements for multimedia databases A client accessing multimedia data over computer networks needs to identify a schedule for retrieving various media objects composing the database The book identifies possible ways for generating a retrieval schedule Chapter 8 ties together the techniques discussed in the previous chapters by providing a simple architecture of a distributed multimedia database management system Multimedia Database Management Systems can be used as a text for graduate students and researchers working in the area of multimedia databases In addition the book serves as essential reading material for computer professionals who are in or moving to the area of multimedia databases

**Database and Data Communication Network Systems, Three-Volume Set** Cornelius T. Leondes, 2002-07-02 Database and Data Communication Network Systems examines the utilization of the Internet and Local Area Wide Area Networks in all areas of human endeavor This three volume set covers among other topics database systems data compression database architecture data acquisition asynchronous transfer mode ATM and the practical application of these technologies The international collection of contributors was culled from exhaustive research of over 100 000 related archival and technical journals This reference will be indispensable to engineering and computer science libraries research libraries and telecommunications networking and computer companies It covers a diverse array of topics including Techniques in emerging database system architectures Techniques and applications in data mining Object oriented database systems Data acquisition on the WWW during heavy client server traffic periods Information exploration on the WWW Education and training in multimedia database systems Data structure techniques in rapid prototyping and manufacturing Wireless ATM in data networks for mobile systems Applications in corporate finance Scientific data visualization Data compression and information retrieval Techniques in medical systems intensive care units

**Designing Instruction for Technology-Enhanced Learning** Rogers, Patricia L., 2001-07-01 What is the connection between technology and learning Do students really learn more in technology enhanced environments How does teaching change when technology is introduced This book addresses the gap between technology skills and the application of those skills in teaching and learning Authors will guide the reader from focusing on technology to focusing on the goals of using technology to facilitate the teaching and learning experience Recommendations and practical advice on how to match teaching strategies with supporting media technology are also provided
