**Schlosser, L. A. & Simonson, M., ISBN: 1607521393, EAN:9781607521396,  
Publisher: Information Age Publishing, Pages:249, June 2009**

**Reviewed by Ozlem OZAN  
Computer Education and Instructional Technologies,  
Eskisehir Osmangazi University,  
Eskisehir, TURKEY**

Because *Distance Education* (DE) provides students the new opportunities for accessible and lifelong education, it is getting more and more popular day by day over the entire world, and as stated in the book it has become a major topic of interest in the field of educational communication and technology.

This is one of the basic books in the field of DE. It is written by Lee Ayers Schlosser and Michael Simonson. Lee Ayers Schlosser, EdD, PhD is in Extended Campus Program of Southern Oregon University and an associate professor of Criminology Department at Southern Oregon University. Michael R. Simonson, Ph.D. is a professor of Instructional Technology & Distance Education at Nova Southeastern University. There are three editions of the book.

In 2002 first edition, in 2006 second edition, in 2009 third and last edition was published. If you look at content of first and second edition of the book, you can't see very big difference between them. But in third edition there are considerable changes.

In first and second edition *definitions, brief history and theory of DE, glossary of terms* are given. In addition to these titles, third edition provides information about *effectiveness, status and future of DE, learning outcomes, perceptions and attributes of learners, interaction, barriers, research in DE*. The book is consisted of 249 pages (+vii) and divided into four sections.

In part I, Distance Education is defined as "institutional-based, formal education where the learning group is separated, and where interactive telecommunications systems are used to connect learners, resources, and instructors (Simonson, 2003)".

After that, definitions of Holmberg (1986), Peters (1988), Moore (1994), Keegan (1996) and Garrison and Shale (1987) are given as traditional definitions. Furthermore, emerging definitions are discussed in the light of rapid changes in society and technology. Brief history of DE is provided from correspondence study, to electronic communication, to distance teaching universities.

**Identification, Evaluation, and Perceptions of Distance Education Experts** Kurubacak, Gulsun, Yuzer, T. Volkan, 2015-02-28 Instructional quality can make or break the learning experience especially in digital environments where the expressional nuances of interpersonal communication are lost The most effective distance education instructors and experts are those who recognize the educational needs of students and are able to address those needs through creative use of the technological tools available to them Identification Evaluation and Perceptions of Distance Education Experts explores the current and future trends needs and priorities that affect the development of distance education in a postmodern world This premier reference work will be of significance to those interested in online learning teaching and training communication and education across multiple sectors such as universities colleges schools profit non profit e organizations and e commerce

**Evaluation in Distance Education and E-learning** Valerie Ruhe, Bruno D. Zumbo, 2009-01-01 With the rapid proliferation of distance education and e learning courses the need is growing for a comprehensive professional approach to evaluating their effectiveness This indispensable book offers a road map to guide evaluation practice in these innovative learning environments Providing practical step by step guidelines and tools for conducting evaluation studies including how to deal with stakeholders develop surveys and interview protocols collect other scientific evidence and analyze and blend mixed methods data the work also features a template for writing high quality reports The unfolding model developed by the authors draws on Messick s influential assessment framework and applies it to program evaluation Two case studies of actual programs a distance learning course and an e learning course demonstrate the unfolding model in action

*Online and Distance Learning: Concepts, Methodologies, Tools, and Applications* Tomei, Lawrence A., 2007-07-31 This comprehensive six volume collection addresses all aspects of online and distance learning including information communication technologies applied to education virtual classrooms pedagogical systems Web based learning library information systems virtual universities and more It enables libraries to provide a

foundational reference to meet the information needs of researchers educators practitioners administrators and other stakeholders in online and distance learning Provided by publisher **Teaching and Learning at a Distance** Michael Simonson,Susan Zvacek,2024-01-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more Equivalency theory is the fourth theme of the book Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It can serve as a stand alone source of information [ALA Glossary of Library and Information Science](#) Michael Levine-Clark,Toni Carter Dean,2013-05-21 This fourth edition of ALA Glossary of Library and Information Science presents a thorough yet concise guide to the specific words that describe the materials processes and systems relevant to the field of librarianship **Enriching Teaching and Learning Environments With Contemporary Technologies** Durnali, Mehmet,Limon, İbrahim,2020-02-07 Educational technologies have revolutionized the learning and teaching environments Offline online applications and social media have changed the conventional learning and teaching habits and competencies In terms of learners it has been empirically proven

that the use of educational technologies in the classroom make learning easier and more enjoyable On the other hand it also poses threats to students such as cyberbullying and online addiction While exploiting the opportunities of technological use in the classroom educators must also remain vigilant and formulate ways to overcome the challenges and risks brought by technology Enriching Teaching and Learning Environments With Contemporary Technologies is an essential research publication that aims to present exemplary practices of technology use and their management in pedagogical purposes in learning and teaching environments The book also analyzes problems that may arise and develops policies on educational technologies and the exploitation of technology with pedagogical purposes as part of the discussion to solve these challenges Featuring a wide range of topics such as augmented reality mass media and religious education this book is ideal for educators who want to use technology in class educational administrators who have responsibilities for developing policies on educational technologies and managing the use of them and researchers who want to carry out a deep investigation into the subject Additionally educational software developers academicians instructional designers curriculum developers education professionals and students will also benefit from the research contained within the book

**Self-directed multimodal learning in higher education** Jako Olivier,2020-12-31 This book aims to provide an overview of theoretical and practical considerations in terms of self directed multimodal learning within the university context Multimodal learning is approached in terms of the levels of multimodality and specifically blended learning and the mixing of modes of delivery contact and distance education As such this publication will provide a unique snapshot of multimodal practices within higher education through a self directed learning epistemological lens The book covers issues such as what self directed multimodal learning entails mapping of specific publications regarding blended learning blended learning in mathematics geography natural science and computer literacy comparative experiences in distance education as well as situated and culturally appropriate learning in multimodal contexts This book provides a unique focus on multimodality in terms of learning and delivery within the context of self directed learning Therefore the publication would not only advance the scholarship of blended and open distance learning in South Africa but also the contribute to enriching the discourse regarding self direction From this book readers will get an impression of the latest trends in literature in terms of multimodal self directed learning in South Africa as well as unique empirical work being done in this regard

Instructional Technology Research, Design and Development: Lessons from the Field Alias, Nor Aziah,2011-11-30 Design and development research which has considerable implications for instructional design focuses on designing and exploring products artifacts and models as well as programs activity and curricula Instructional Technology Research Design and Development Lessons from the Field is a practical text on design and development research in the field of instructional technology This book gives readers an overview of design and development research and how it is conducted in different contexts and for various purposes Further this reference source provides readers with practical knowledge on design and development research gained through

investigation of lessons learned in the field
