Business The Orienting Reflex in Humans H. D. Kimmel, E. H. van Olst, J. F. Orlebeke, 2021-09-30. Originally published in 1979, the world's leading researchers contributed chapters describing their work on the orienting reflex in humans. The contributions at the time current and comprehensive in a sense that each facet of contemporary research was represented, address the orienting reflex now recognized as a fundamental component of human learning and cognitive function. The authors contributing to this volume emphasize both theoretical and methodological issues as well as present more empirical research. Here is a volume that spans all current work on the orienting reflex in humans, both basic and applied, from the laboratory as well as clinical data, and which would be of immense interest to psychologists, psychophysicists, psychiatrists, physiologists, and all others interested in this fascinating topic. *Saturday Review*, 1865 *Journal of Petroleum Technology*, 1989 **Time Domains of Hypoxia Adaptation: Evolutionary Insights and Applications** Tatum S. Simonson, Francisco C. Villafuerte, 2021-12-22

Resilience of coastal systems and their human partners International Union for the Conservation of Nature and Natural Resources (IUCN), 2015-07-09. This report explains the ecology and social profile of coastal systems in Kenya, Mozambique, and Tanzania in order to contribute to the development of effective strategies to enhance the resilience of marine and coastal systems in the Western Indian Ocean. Special consideration is given to the effects and consequences of climate change and economic development. **Underwater Medicine and Related Sciences** Margaret F. Werts, Charles W. Shilling, 2012-12-06. This volume is the third annotated bibliography on this subject area to be compiled by these authors. The first published by Gordon and Breach Science Publishers in 1971 was entitled AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE. It covered material published during the 1960s. The second volume entitled UNDERWATER MEDICINE AND RELATED SCIENCES: A GUIDE TO THE LITERATURE published in 1973 by Plenum Press covered primarily

material published during 1970 and 1971 with some material from 1968 and 1969 The present volume covers material published during 1972 and 1973 but here again some earlier material has been included The purpose of these annotated bibliographies is to make available a large proportion of the published material in abstract form indexed in such a manner as to make it possible to compile a reasonably complete annotated bibliography on any specific subject area in the field It is possible thus to learn where the work is being done by whom and how extensively Also it becomes obvious what areas of research are lacking or inadequate These specific searches can also form a background of reference material on which to base further research or from which to write monographs or state of the art surveys Papers articles and reports listed here are in most cases readily available
