Grady Klein, Yoram Bauman, 2010 [The Cartoon Introduction to Economics](#) Grady Klein, Yoram Bauman, 2010 [The Cartoon Introduction to Climate Change](#) Yoram Bauman, Grady Klein, 2014-06-05 Climate change is no laughing matter but maybe it should be The topic is so critical that everyone from students to policy makers to voters needs a quick and easy guide to the basics *The Cartoon Introduction to Climate Change* entertains as it educates delivering a unique and enjoyable presentation of mind blowing facts and critical concepts Stand up economist Yoram Bauman and award winning illustrator Grady Klein have created the funniest overview of climate science predictions and policy that you'll ever read You'll giggle but you'll also learn about everything from Milankovitch cycles to carbon taxes If those subjects sound daunting consider that Bauman and Klein have already written two enormously successful cartoon guides to economics making this notoriously dismal science accessible to countless readers Bauman has a PhD in economics and has taught at both the high school and college level but he now makes a living performing at comedy clubs universities and conferences sharing the stage with personalities as diverse as Robin Williams and Paul Krugman The authors know how to get a laugh and they know their facts

This cartoon introduction is based on the latest report from the authoritative Intergovernmental Panel on Climate Change IPCC and integrates Bauman's expertise on economics and policy. If economics can be funny then climate science can be a riot. Sociologists have argued that we don't address global warming because it's too big and frightening to get our heads around. The Cartoon Introduction to Climate Change takes the intimidation and gloom out of one of the most complex and hotly debated challenges of our time. References available at <http://standupeconomist.com/cartoon/climate> *The Cartoon Introduction to Climate Change, Revised Edition* Yoram Bauman, Grady Klein, 2022-06-14. When The Cartoon Introduction to Climate Change was first published in 2014 it offered something entirely new: a fun illustrated guide to a planetary crisis. If that sounds like an oxymoron you've never seen the carbon cycle demonstrated through yoga poses or a polar bear explaining evolution to her cubs. That creativity comes from the minds of Yoram Bauman, the world's first and only stand-up economist and award-winning illustrator Grady Klein. After seeing their book used in classrooms and the halls of Congress alike the pair has teamed up again to fully update the guide with the latest scientific data from the IPCC Intergovernmental Panel on Climate Change. A lot has happened to the climate over the last decade and the authors tackle the daunting statistics with their trademark humor. They realize it's better to laugh than cry when confronting mind-blowing facts about our changing world. Readers will become familiar with critical concepts but they'll also smile as they learn about climate science projections and policy. Sociologists have argued that we don't address climate change because it's too big and frightening to get our heads around. The Cartoon Introduction to Climate Change takes the intimidation and gloom out of one of the most important challenges of our time.
