

No. 151 Moldboard Plow with notched bottom  
and combination jointer.

### INTRODUCTION

The No. 151 Moldboard Plow is a two-way plow. It is designed for use on a Farmall 150, 155, or 160 Tractor equipped with Fast-Hitch also having 13-24 maximum width-beam rear tires. Raising, lowering, and depth adjustment is accomplished by hydraulic control through the hitch. A notched coupling prong at the front end of the plow provides easy detaching and attaching to the Fast-Hitch socket. The beam has 12" of clearance.

The plow is supplied with either 14" or 16" left and right turning bottoms which are assembled opposed to each other and oscillated on a common longitudinal axis. The bottoms which lock automatically in the working position, are oscillated manually while the plow is raised for turning on the headlands.

The plow is regularly equipped with plain rolling cutters having plain 14" blades. Cutters are available on special order which have 14" notched blades. The notched blades in a better job of cutting trash such as corn and cotton stalks, consequently a better job of covering the trash is obtained. Combination jointers are available on special order for use with the rolling cutters.

It is recommended that the Fast-Hitch be equipped with the Cushion Spring Attachment which is used on the hitch pull bar. This attachment will be of especial benefit in fields where stones or stumps abound.

Even a "Bumper" should not be used for the greater because of the danger of it running in or getting into the moving path.
