Technologies and Early Warning Systems: Data Mining Applications for Risk Detection Koyuncugil, Ali Serhan,Ozgulbas, Nermin,2010-09-30 Surveillance Technologies and Early Warning Systems Data Mining Applications for Risk Detection has never been more important as the research this book presents an alternative to conventional surveillance and risk assessment This book is a multidisciplinary excursion comprised of data mining early warning systems information technologies and risk management and explores the intersection of these components in problematic domains It offers the ability to apply the most modern techniques to age old problems allowing for increased effectiveness in the response to future eminent and present risk Internet Intermediaries and Trade Mark Rights Althaf Marsoof,2019-06-05 Despite the apparent advantages of the internet there is little debate that it facilitates intellectual property infringements including infringements of trade mark rights Infringers not only remain hidden by the anonymity the internet provides but also take advantage of its increasing reach and the associated challenges with regard to cross border enforcement of rights These factors among others have rendered the internet a growing source of counterfeit and other infringing products It has therefore become necessary for right holders to shift their focus from individual infringers to internet intermediaries such as Internet Service Providers ISPs hosts and navigation providers which are responsible in numerous ways for making content promoting infringements available to internet users In light of these developments this book conducts a comprehensive analysis of the liability of such intermediaries for trade mark infringements and considers the associated issues and challenges in the diverging approaches under which liability may be imposed At present however neither UK trade mark law nor English common law principles relating to accessorial liability provide a basis to hold internet intermediaries liable for trade mark infringements As such this book considers approaches adopted in some of the Continental European countries and the US in order to propose reforms aimed at addressing gaps in the existing legal framework This book also examines alternative remedies such as notice and takedown and injunctions and discusses the associated shortcomings of each of these remedies *Research Handbook on EU Internet Law* Andrej Savin,Jan Trzaskowski,2023-10-06 The Internet has brought about unprecedented changes to modern life creating a connected society but also radically opening up the question of how to design and apply legal rules in a digital world This thoroughly revised second edition provides an updated exploration of the latest developments and controversies in European Internet law **Telecommunications Law and Regulation in Nigeria** Uchenna Jerome Orji,2018-12-19 The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s As of 2017 the telecommunications industry

was one of the fastest growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product. The telecommunications industry however remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria. This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry. It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation, the development of the Nigerian telecommunications industry from 1886 to 2017, the legal basis for the regulation of the industry, the licensing and duties of service providers, the regulation of network infrastructure, the protection of consumers, the regulation of competition, interconnection, universal access, and environmental protection, and the resolution of industry disputes. This book will be useful to policy makers, legislators, regulators, lawyers, law students, investors, operators, and consumers, as well as any person interested in the Nigerian telecommunications industry.

Government Cloud Procurement Kevin McGillivray, 2021-12-16. In *Government Cloud Procurement*, Kevin McGillivray explores the question of whether governments can adopt cloud computing services and still meet their legal requirements and other obligations to citizens. The book focuses on the interplay between the technical properties of cloud computing services and the complex legal requirements applicable to cloud adoption and use. The legal issues evaluated include data privacy law, GDPR, and the US regime jurisdictional issues, contracts, and transnational private law approaches to addressing legal requirements. McGillivray also addresses the unique position of governments when they outsource core aspects of their information and communications technology to cloud service providers. His analysis is supported by extensive research examining actual cloud contracts obtained through Freedom of Information Act requests. With the demand for cloud computing on the rise, this study fills a gap in legal literature and offers guidance to organizations considering cloud computing.
