Computer Performance Engineering Dieter Fiems, Marco Paolieri, Agapios N. Platis, 2016-09-15 This book constitutes the refereed proceedings of the 13th European Workshop on Computer Performance Engineering EPEW 2016 held in Chios Greece in October 2016 The 14 papers presented together with 2 invited talks in this volume were carefully reviewed and selected from 25 submissions The papers presented at the workshop reflect the diversity of modern performance engineering with topics ranging from the analysis of queueing networks and stochastic processes to performance analysis of computer systems and networks and even modeling of human behavior Power System Operation, Utilization, and Control John

Fuller, Pamela Obiomon, Samir I. Abood, 2022-07-21 This book presents power system analysis methods that cover all aspects of power systems operation utilization control and system management At the beginning of each chapter an introduction is given describing the objectives of the chapter The authors have attempted to present power system parameters in a lucid logical step by step approach in a lucid logical step by step approach In recognition of requirements by the Accreditation Board for Engineering and Technology ABET on integration of engineering computer tools the authors demonstrate the use of MATLAB programming in obtaining solutions to engineering power problems MATLAB is introduced in a student friendly manner and follow up is given in Appendix A The use of MATLAB and power system applications are presented throughout the book Practice problems immediately follow each illustrative example Students can follow the example step by step to solve the practice problems These practice problems test students comprehension and reinforce key concepts before moving on to the next chapter In each chapter the authors discuss some application aspects of the chapter's concepts using computer programming The material covered in the chapter applied to at least one or two practical problems to help students see how the concepts are used in real life situations Thoroughly worked examples are provided at the end of every section These examples give students a solid grasp of the solutions and the confidence to solve similar problems themselves

Designed for a three hour semester course on Power System Operation Utilization and Control this book is intended as a textbook for a senior level undergraduate student in electrical and computer engineering The prerequisites for a course based on this book are knowledge of standard mathematics including calculus and complex numbers and basic undergraduate engineering courses

Scientific and Technical Aerospace Reports ,1995 *7th UK Computer and Telecommunications Performance Engineering Workshop* Jane E. Hillston,Peter J.B. King,Robert J. Pooley,2013-06-29

Performance engineering is a fast moving field where advances in technology mean that new issues constantly need to be addressed In response to this the UK Computer and Telecommunications Performance Engineering workshops were set up in 1985 to provide a valuable opportunity for the discussion and exchange of ideas They have subsequently become well established as the focus for academic and industrial practitioners from the UK and Europe with an interest in performance and modelling and analysis This volume contains the 16 papers which were presented at the 7th annual workshop held in Edinburgh in July 1991 The workshop highlighted various aspects of parallel computing an area which is attracting an increasing amount of interest and the work presented in these papers is of particular interest as the contributors used real analysis to evaluate their models The papers cover an unusually wide range of topics both practical and theoretical including advances in queueing theory common performance problems and their solutions assessments of available tools and presentations of new theoretical results The result is an extremely comprehensive coverage of this important and challenging field This volume provides an up to date assessment of work being carried out by performance engineers in the UK and Europe and will be an invaluable reference book for researchers and practitioners wishing to familiarise themselves with the benefits of performance and analysis
