Climate Politics in Populist Times Mirjam Gruber,2024-10-08 This book navigates the neglected territory where far-right populism intersects with climate change, presenting a nuanced examination that transcends traditional research boundaries. In recent decades, Europe has grappled with the surge of far-right and populist movements fueling robust academic debates. Simultaneously, the global discourse on climate change has become increasingly pervasive in societal and political spheres. This book provides a comprehensive exploration of how populist far-right parties discuss climate change within their national contexts, focusing on Germany, Spain, and Austria. Using a meticulous methodology rooted in critical discourse studies, Mirjam Gruber examines the perspectives on climate change held by mainstream parties, thereby defining the national policy field. Gruber then delves into the discourse about climate change of populist far-right parties, revealing a complex web of obstructionist arguments intricately tied to the national policy context. By analyzing a diverse array of documents spanning five years, including social media posts, press releases, parliamentary debates, and policy documents, Gruber uncovers a stark contrast between the willingness of mainstream parties to address climate concerns and the obstructionist rhetoric employed by their far-right counterparts. This illuminating exploration underscores the importance of context in understanding political communication and provides profound insights into how different nations frame the climate change narrative. *Climate Politics in Populist Times* will be of great interest to students and scholars of climate change, environmental politics, climate change communication, and populist far-right ideologies.

Cultures and Politics of Global Communication: Volume 34, Review of International Studies Costas M. Constantinou, Oliver P. Richmond, Alison Watson, 2008-06-12 This special issue of *Review of International Studies* focuses on how International Relations (IR) communicates with the world and vice versa. It opens up the discussion of the politics of communication within the discipline and beyond. With a variety of different mediums ranging from media, film, memory, music, culture, and emotions, this book seeks to accentuate their importance for IR both as a source of knowledge and as an ideational exchange which shapes IR. It examines the diverse ways that multidisciplinary thinkers try to understand and explain global routes, mobilities, cultures, commodifications, singularities, discourses, and aestheticisations. This special issue specifically addresses three interrelated themes: How international and global studies approach the question of communication; how to conceptualise and respond to the globalisation of communication; and how global problems get

communicated within and across the institutional settings of the epistemic disciplines in general and the IR discipline in particular

Multicultural Questions Christian Joppke, Steven Lukes, 1999-10-07 This volume assembles leading scholars from a range of disciplines to debate multiculturalism in theory and practice The volume is grouped around four central questions raised by multiculturalism Is universalism ethnocentric Does multiculturalism threaten citizenship Do minorities require group rights and what can Europe learn from North America The book aims to answer these questions by moving the debate about multicultural questions into a more consensual mode The authors show a resistance to either endorsing or rejecting multiculturalism but a preference for dissecting and differentiating the concrete historical and geographical contexts in which specified versions of multiculturalism make sense and others in which they do not

Theory in Social and Cultural Anthropology R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader s Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader s Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

The Magic of Concepts Rebecca E. Karl, 2017-03-02 In The Magic of Concepts Rebecca E Karl interrogates the economic as concept and practice as it was construed historically in China in the 1930s and again in the 1980s and 1990s Separated by the Chinese Revolution and Mao s socialist experiments each era witnessed urgent discussions about how to think about economic concepts derived from capitalism in modern China Both eras were highly cosmopolitan and each faced its own global crisis in economic and historical philosophy in the 1930s capitalism s failures suggested that socialism offered a plausible solution while the abandonment of socialism five decades later provoked a rethinking of the relationship between history and the economic as social practice Interweaving a critical

historiography of modern China with the work of the Marxist trained economist Wang Yanan Karl shows how magical concepts based on dehistoricized Eurocentric and capitalist conceptions of historical activity that purport to exist outside lived experiences have erased much of the critical import of China's twentieth century history In this volume Karl retrieves the economic to argue for a more nuanced and critical account of twentieth century Chinese and global historical practice

Globalization and Environmental Challenges Hans Günter Brauch,Ürsula Oswald Spring,Czeslaw Mesjasz,John Grin,Pál Dunay,Navnita Chadha Behera,Béchir Chourou,Patricia Kameri-Mbote,P. H. Liotta,2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century

Politicizing Political Liberalism Gabriele Badano,Alasia Nuti,2024-10-22 How should broadly liberal democratic societies stop illiberal and antidemocratic views from gaining influence while honouring liberal democratic values This question has become particularly pressing after the recent successes of right wing populist leaders and parties across Europe in the US and beyond This book develops a normative account of liberal democratic self defence that denounces the failures of real world societies without excusing those supporting illiberal and antidemocratic political actors This account is innovative in focusing not only on the role of the state but also on the duties of nonstate actors including citizens partisans and municipalities Consequently it also addresses cases where the central government has at least been partly captured by illiberal and antidemocratic agents Gabriele Badano and Alasia Nuti's approach builds on John Rawls's treatment of political liberalism and his awareness of the need to contain unreasonable views that is views denying that society should treat every person as free and equal through a mutually acceptable system of social cooperation where pluralism is to be expected The authors offer original solutions to vexed problems within political liberalism by putting forward a new account of the relation between ideal and non ideal theory explaining why it is justifiable to exclude unreasonable persons from the constituency of public reason and showing that the strictures of public reason do not apply to those suffering from severe injustice In doing so the book further politicizes political liberalism and turns it into a framework that can insightfully respond to the challenges of real politics
