Conceptual Structures: Standards and Practices William M. Tepfenhart, Walling Cyre, 2007-07-23 With all of the news about the Internet and the Y2K problem it is easy to forget that other areas of computer science still exist Reading the newspaper or watching the television conveys a very warped view of what is happening in computer science This conference illustrates how a maturing subdiscipline of computer science can continue to grow and integrate within it both old and new approaches despite or perhaps due to a lack of public awareness The conceptual graph community has basically existed since the 1984 publication of John Sowa's book *Conceptual Structures Information Processing In Mind and Machine* In this book John Sowa laid the foundations for a knowledge representation model called conceptual graphs based on semantic networks and the existential graphs of C S Peirce Conceptual graphs constitutes a very powerful and expressive knowledge representation scheme inheriting the benefits of logic and the mathematics of graphs The expressiveness and formal underpinnings of conceptual graph theory have attracted a large international community of researchers and scholars The International Conferences on Conceptual Structures and this is the seventh in the series is the primary forum for these researchers to report their progress and activities As in the past the doors were open to admit alternate representation models and approaches

Conceptual Structures: Logical, Linguistic, and Computational Issues Bernhard Ganter, Guy W. Mineau, 2006-12-30 Computerscientistscreatemodelsofaperceivedreality ThroughAI techniques these models aim at providing the basic support for emulating cognitive behavior such as reasoning and learning which is one of the main goals of the AI research effort Such computer models are formed through the interaction of various acquisition and inference mechanisms perception concept learning conceptual clustering hypothesis testing probabilistic inference etc and are represented using different paradigms tightly linked to the processes that use them Among these paradigms let us cite biological models neural nets genetic programming logic based models first order logic modal logic rule based systems virtual reality models object systems agent systems probabilistic models Bayesian networks fuzzy logic linguistic models conceptual dependency graphs language based representations etc One of the strengths of the Conceptual Graph CG theory is its versatility in terms of the representation paradigms under which it falls It can be viewed and therefore used under different representation paradigms which makes it a popular choice for a wealth of applications Its full coupling with different cognitive processes lead to the opening of the field toward related research communities such as the Description Logic Formal Concept Analysis and Computational Linguistic communities We now see more and more research results from one community enrich the other laying the foundations of common philosophical grounds from which a successful synergy can emerge

*Conceptual Structures in Practice* Pascal Hitzler, Henrik Scharfe, 2016-04-19 Exploring fundamental research questions *Conceptual Structures in Practice* takes you through the basic yet nontrivial task of establishing conceptual relations as the foundation for research in knowledge representation and knowledge mining It includes contributions from leading researchers in both the conceptual graph and

formal concept analysis      Conceptual Structures: Integration and Interfaces Uta Priss, Dan Corbett, Galia Angelova, 2003-08-06      **Knowledge Representation and the Semantics of Natural Language** Hermann Helbig, 2005-12-19 Natural Language is not only the most important means of communication between human beings it is also used over historical periods for the preservation of cultural achievements and their transmission from one generation to the other During the last few decades the flood of digitalized information has been growing tremendously This tendency will continue with the globalization of information societies and with the growing importance of national and international computer networks This is one reason why the theoretical understanding and the automated treatment of communication processes based on natural language have such a decisive social and economic impact In this context the semantic representation of knowledge originally formulated in natural language plays a central part because it connects all components of natural language processing systems be they the automatic understanding of natural language analysis the rational reasoning over knowledge bases or the generation of natural language expressions from formal representations This book presents a method for the semantic representation of natural language expressions texts sentences phrases etc which can be used as a universal knowledge representation paradigm in the human sciences like linguistics cognitive psychology or philosophy of language as well as in computational linguistics and in artificial intelligence It is also an attempt to close the gap between these disciplines which to a large extent are still working separately      **Conceptual Structures: Broadening the Base** Harry S. Delugach, Gerd Stumme, 2001-07-18 This book constitutes the refereed proceedings of the 9th International Conference on Conceptual Structures ICCS 2001 held in Stanford CA USA in July August 2001 The 26 revised full papers presented were carefully reviewed and selected for inclusion in the proceedings The book offers topical sections on language and knowledge structures logical and mathematical foundations of conceptual structures conceptual structures for data and knowledge bases conceptual structures and meta data and algorithms and systems      **KI 2004: Advances in Artificial Intelligence** Susanne Biundo-Stephan, 2004 This book constitutes the refereed proceedings of the 27th Annual German Conference on Artificial Intelligence KI 2004 held in Ulm Germany in September 2004 The 29 revised full papers presented together with 5 invited contributions were carefully reviewed and selected from 103 submissions The papers are organized in topical sections on natural language processing knowledge representation and ontologies planning and search neural networks and machine learning reasoning and robotics and machine perception      **Conceptual Structures**, 2002 *Research and Development in Intelligent Systems XIX* Alun Preece, Frans Coenen, 2012-12-06 M A BRAMER University of Portsmouth UK This volume comprises the refereed technical papers presented at ES2002 the Twenty second SGAI International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 2002 The conference was organised by SGAI the British Computer Society Specialist Group on Artificial Intelligence previously known as SGES The papers in this volume present new and innovative developments in the field divided into

sections on Machine Learning Knowledge Representation and Reasoning Knowledge Acquisition Constraint Satisfaction Scheduling and Natural Language Processing This year's prize for the best refereed technical paper was won by a paper entitled Covering the Path Space A Casebase Analysis for Mobile Robot Path Planning by M Kruusmaa Department of Mechatronics Tallinn Technical University Estonia and J Willemson Department of Computer Science Tartu University Estonia SGAI gratefully acknowledges the long term sponsorship of Hewlett Packard Laboratories Bristol for this prize which goes back to the 1980s This is the nineteenth volume in the Research and Development series The Application Stream papers are published as a companion volume under the title Applications and Innovations in Intelligent Systems X On behalf of the conference organising committee I should like to thank all those who contributed to the organisation of this year's technical programme in particular the programme committee members the referees and our administrators Lindsay Turbert and Helen Forster

Riquelme, Miguel Toro Bonilla, 2003-06-30 The 8th Ibero American Conference on Artificial Intelligence IBERAMIA 2002 took place in Spain for the second time in 14 years the first conference was organized in Barcelona in January 1988 The city of Seville hosted this 8th conference giving the participants the opportunity of enjoying the richness of its historical and cultural atmosphere Looking back over these 14 years key aspects of the conference such as its structure organization the quantity and quality of submissions the publication policy and the number of attendants have significantly changed Some data taken from IBERAMIA 88 and IBERAMIA 2002 may help to illustrate these changes IBERAMIA 88 was planned as an initiative of three Ibero American AI associations the Spanish Association for AI AEPIA the Mexican Association for AI SMIA and the Portuguese Association for AI APIA The conference was organized by the AEPIA staff including the AEPIA president Jos Cuena the secretary Felisa Verdejo and other members of the AEPIA board The proceedings of IBERAMIA 88 contain 22 full papers grouped into six areas knowledge representation and reasoning learning AI tools expert systems language and vision Papers were written in the native languages of the participants Spanish Portuguese and Catalan Twenty extended abstracts describing ongoing projects were also included in the proceedings

[Dictionary of XML Technologies and the Semantic Web](#) Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensible definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies

such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol

**Concept Lattices** Peter Eklund, 2011-04-02 This volume contains the Proceedings of ICFCA 2004 the 2nd International Conference on Formal Concept Analysis The ICFCA conference series aims to be the premier forum for the publication of advances in applied lattice and order theory and in particular scientific advances related to formal concept analysis Formal concept analysis emerged in the 1980s from efforts to restructure lattice theory to promote better communication between lattice theorists and potential users of lattice theory Since then the field has developed into a growing research area in its own right with a thriving theoretical community and an increasing number of applications in data and knowledge processing including data visualization information retrieval machine learning data analysis and knowledge management In terms of theory formal concept analysis has been extended into attribute exploration Boolean judgment contextual logic and so on to create a powerful general framework for knowledge representation and reasoning This conference aims to unify theoretical and applied practitioners who use formal concept analysis drawing on the fields of mathematics computer and library sciences and software engineering The theme of the 2004 conference was Concept Lattices to acknowledge the colloquial term used for the line diagrams that appear in almost every paper in this volume ICFCA 2004 included tutorial sessions demonstrating the practical benefits of formal concept analysis and highlighted developments in the foundational theory and standards The conference showcased the increasing variety of formal concept analysis software and included eight invited lectures from distinguished speakers in the field Seven of the eight invited speakers submitted accompanying papers and these were reviewed and appear in this volume
