Concrete is the most widely used man made product in the world and is second only to water as the world's most utilized substance. It is an affordable and reliable material that is applied throughout the infrastructure of any nation's construction industrial transportation defence utility and residential sectors. In its simplest form it is a mixture of cement paste and aggregates. For producing quality concrete not only good quality ingredients are necessary but good rules in manufacturing concrete are also essential. The quality of the ingredients is always judged in the laboratory by performing various tests on them by following standard procedures. This manual has been prepared in order to impart efficient learning of student through outcomes based education suggested by ABET.

**Laboratory Manual for Concrete Technology** P. D. Kulkarni, L. N. Mittal, 1985      *Concrete Manual* United States. Bureau of Reclamation, 1975      Concrete Manual, 1988      **Concrete Manual** United States. Department of the Interior. Water and Power Resources Service, 1975      NATFREQ Users Manual Wilfred D. Iwan, 1984. This manual describes a computer program that has been developed to calculate natural frequencies and mode shapes of taut cables with attached masses and spring mass combinations. The equations of motion are solved by an iterative technique allowing accurate calculation even for extremely high mode numbers. The approach has the advantages that it is fast accurate and can easily accommodate a variety of system configurations including bodies attached to the cable. This document covers the theory used in the development of the code. Line by line descriptions of both the input and output data are given and several examples illustrating the use of the program are included. Some of the difficulties that may be encountered when running large complex problems are discussed and possible solutions proposed. The structure of the program is described in moderate detail. The program is written in a style which makes additions or modifications easy to implement.
