Conceptions of Dreaming from Homer to 1800 G. W. Pigman III, 2019-01-31
Conceptions of Dreaming from Homer to 1800 traces the history of ideas about dreaming during the period when the admonitory dream was the main focus of learned interest from the Homeric epics through the Renaissance and the period when it began to become a secondary focus the eighteenth century. The book also considers the two most important dream theorists at the turn of the twentieth century, Sigmund Freud and Sante de Sanctis. While Freud is concerned with questions of what a dream means and how to interpret it, de Sanctis offers a synthesis of nineteenth-century research into what a dream is and represents the Enlightenment transition from particular facts to general laws.

Conscious Mind, Sleeping Brain J. Gackenbach, S. LaBarge, 2012-12-06
A conscious mind in a sleeping brain: the title of this book provides a vivid image of the phenomenon of lucid dreaming in which dreamers are consciously aware that they are dreaming while they seem to be soundly asleep. Lucid dreamers could be said to be awake to their inner worlds while they are asleep to the external world. Of the many questions that this singular phenomenon may raise, two are foremost: What is consciousness? And what is sleep? Although we cannot provide complete answers to either question here, we can at least explain the sense in which we are using the two terms. We say lucid dreamers are conscious because their subjective reports and behavior indicate that they are explicitly aware of the fact that they are asleep and dreaming; in other words, they are reflectively conscious of themselves. We say lucid dreamers are asleep primarily because they are not in sensory contact with the external world, and also because research shows physiological signs of what is conventionally considered REM sleep. The evidence presented in this book is preliminary, as it is still ought to make it clear that lucid dreaming is an experiential and physiological reality. Whether we should consider it a paradoxical form of sleep or a paradoxical form of waking, or something else entirely, it seems too early to tell.
