**The Craft of Research, Third Edition** Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15 With more than 400 000 copies now in print The Craft of Research is the unrivaled resource for researchers at every level from first year undergraduates to research reporters at corporations and government offices Seasoned researchers and educators Gregory G Colomb and Joseph M Williams present an updated third edition of their classic handbook whose first

and second editions were written in collaboration with the late Wayne C Booth. *The Craft of Research* explains how to build an argument that motivates readers to accept a claim, how to anticipate the reservations of readers and to respond to them appropriately, and how to create introductions and conclusions that answer that most demanding question: So what? The third edition includes an expanded discussion of the essential early stages of a research task: planning and drafting a paper. The authors have revised and fully updated their section on electronic research, emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search. A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers. Throughout, the authors have preserved the amiable tone, the reliable voice, and the sense of directness that have made this book indispensable for anyone undertaking a research project.

Citizen Perceptions of the European Union Talke Klara Hoppmann, 2010. This book examines user perceptions of European Union institutions and compares them to perceptions communicators within these institutions have of their users. Analysing the images both sides have through their interaction on the EUROPA website [www.europa.eu](http://www.europa.eu) helps to show where communicator intentions and user perceptions do or do not overlap. The timeliness of this issue could not be more striking than in the current internal and external debates surrounding the EU, e.g. the No votes on the common constitution. With this in mind, every possible way of interaction should be reconsidered in order for citizens to get more involved and feel more connected. Next to mass media, the Internet plays an increasingly important role in people's lives. Even though the Internet may not currently be a dominant source of information about the EU relative to other mass media outlets, it continues to increase in importance as part of most people's everyday life, in particular for the younger generation who turn to it for information. The main focus of this book is on the integration of both the user and the communicator perspectives. By looking at user needs in comparison to the production processes that determine the information structure of a Web site, the usability of a Web site is defined. The user experience online in turn determines the users' perceptions of the institutions and their attitudes towards the European Union.
