

Energy Flow in Ecosystems

The open ocean, like all land ecosystems, has many food webs. The chart below provides a list of animals in a typical South Atlantic food web and their sources of food energy. Study the table and answer the questions that follow.

Food Webs in the Ocean

Organisms	Obtain food energy from...
Squid	shrimp, fish
Algae	make their own food by photosynthesis
Fishes	shrimp
Penguins	squid

1. Which organisms are the producers?

2. Which organism is a first-level consumer?

3. What makes the squid's role different from that of other consumers listed in the table?

4. In the space below, draw the ocean food web. Label each organism to identify its energy role in the ecosystem.

Wagner, 2018-10-25 In recent years a global network of science has emerged as a result of thousands of individual scientists seeking to

collaborate with colleagues around the world creating a network which rises above national systems The globalization of science is part of the underlying shift in knowledge creation generally the collaborative era in science Over the past decade the growth in the amount of knowledge and the speed at which it is available has created a fundamental shift where data information and knowledge were once scarce resources they are now abundantly available Collaboration openness customer or problem focused research and development altruism and reciprocity are notable features of abundance and they create challenges that economists have not yet studied This book defines the collaborative era describes how it came to be reveals its internal dynamics and demonstrates how real world practitioners are changing to take advantage of it Most importantly the book lays out a guide for policymakers and entrepreneurs as they shift perspectives to take advantage of the collaborative era in order to create social and economic welfare A View from the Heart June C.
