### IMPORTANT

Please make certain that persons who are to use this strainer thoroughly read and understand these instructions prior to operation. Should you have any questions regarding the operation of this strainer, please call \_\_\_\_\_ and ask to speak with one of our customer service representatives.

## I. SAFETY CONSIDERATIONS

Safety precautions are essential when any filtration equipment is involved. These precautions are necessary when using, storing, and servicing your strainer. If safety precautions are overlooked or ignored, personal injury or product damage may occur. Your strainer was designed for specific applications. It **should not** be modified and/or used for any application other than originally specified. If there are any questions regarding its application or installation, write or call Milacron.

Always heed the following precautions, as they are essential when using your *MLS Full-Flow Strainer*.

- 1) Read this manual carefully. Consider the applications, limitations, and the potential hazards specific to your strainer.
- 2) (Flanged units only) The strainer must be placed on a firm, supporting surface. The inlet or outlet flanges should not suspend the strainer.
- 3) **Absolutely, under no conditions, should the strainer lid or pressure gauges be removed while the strainer is pressurized.** Standard models should never exceed 150 PSI, V-Band clamp models should never exceed 125 PSI.
- 4) Units with damaged or missing parts should **never** be operated. Contact our customer service representatives for replacement parts.
- 5) Back flow prevention devices should be installed upstream of the inlet and downstream of the outlet of the strainer as to prevent back flow or vacuum effects which may be damaging to the strainer element.
- 6) Pressure relief valves of a sufficient size and volume should be installed upstream of the inlet and downstream of the outlet of the strainer. They should be set to relieve pressure at 1.2 times the maximum operating pressure (not to exceed the maximum rated pressure). This helps prevent damage to the strainer and element if severe stoppage or water hammer occurs.

**AT NO TIME SHOULD THE INTERNAL PRESSURE EXCEED THE MAXIMUM RATED PRESSURE FOR YOUR STRAINER**

## II. BEFORE STRAINER OPERATION...

There are a few tasks that must be accomplished before your *MLS Full-Flow Strainer* is ready for operation. Please review the following checklist. When all tasks are complete the strainer is ready to be used.

1. (Flanged Units Only) Is your *MLS Full-Flow Strainer* placed on a firm, supporting surface? Failure to do this may cause stress on the weld joints. Milacron recommends a concrete pad be poured under the base of the strainer.
2. Are the inlet and outlet connections securely fastened to the in-line pipe? The arrows clearly depict flow direction (see
