Restoration Ecology Jelte van Andel, James Aronson, 2012-05-21 Enlarged enhanced and internationalized edition of the first restoration ecology textbook to be published with foreword by Dr Steven Whisnant of Texas A M University and Chair of the Society of Ecological Restoration Since 2006 when the first edition of this book appeared major advances have taken place in restoration science and in the practice of ecological restoration Both are now accepted as key components of the increasingly urgent search for sustainability at global national and community levels hence the phrase New Frontier in the title While the first edition focused on ecosystems and landscapes in Europe this new edition covers biomes and contexts all over the world Several new chapters deal with broad issues such as biological invasions climate change and agricultural land abandonment as they relate to restoration science and ecological restoration

Case studies are included from Australia North America and the tropics This is an accessible textbook for senior undergraduate and graduate level students and early career scientists The book also provides a solid scientific background for managers volunteers and mid career professionals involved in the practice of ecological restoration Review of the first edition I suspect that this volume will find its way onto the shelves of many restoration researchers and practitioners and will be used as a key text in graduate courses where it will help fill a large void My own copy is already heavily bookmarked and will be a constant source of research ideas and lecture material Environmental Conservation Companion Website A companion website with downloadable figures is available at www.wiley.com/go/vanandel/restorationecology
