

Chapter 10 Projectile and Satellite Motion
Satellite in Elliptical Orbit

3. Figure C shows a satellite in elliptical orbit.

a. Repeat the procedure you used for the circular orbit, drawing vectors F and V for each position including proper labeling. Show greater magnitudes with equal lengths and greater magnitudes with greater lengths, but don't bother making the scale accurate.

b. Are your vectors F all the same magnitude?
Why or why not?

c. Are your vectors V all the same magnitude?
Why or why not?

d. Is the angle between vectors F and V everywhere the same or does it vary?

e. Are there places where there is a component of F along V ?

f. Is work done on the satellite when there is a component of F along and in the same direction of V , and if so, does this increase or decrease the KE of the satellite?

g. When there is a component of F along and opposite to the direction of V , does this increase or decrease the KE of the satellite?

h. What can you say about the sum of KE + PE along the orbit?

Figure C

Be very very careful when placing both velocity and force vectors on the same diagram. Not a good practice, for one may construct the resultant of the vectors—ouch!

Don't Draw It!
