successful in terms of faculty accomplishments students graduated and entering advanced study or professional workplace and showing evidence of high morale among both faculty and undergraduates Common elements in many of these programs are abandonment of an almost exclusive emphasis on problem solving and modification of the lecture format to permit teaching of underlying concepts Other variations in traditional introductory physics and chemistry courses are aimed at persuading those simply fulfilling graduation requirements to major in science at bringing minority students into the fold or at combining physics or various sub fields of chemistry in different ways to promote better understanding Harvard's chem phys is provided as an example of such a combination but also as a case study of how innovation can be stymied by a lack of university wide change The author uses methods of ethnography in reporting what makes individual programs interesting what their faculty are doing and what program participants are thinking PR
