The Oxford Handbook of European History, 1914-1945 Nicholas Doumanis, 2016-05-05 The period spanning the two World Wars was unquestionably the most catastrophic in Europe s history Despite such undeniably progressive developments as the radical expansion of women s suffrage and rising health standards the era was dominated by political violence and chronic instability Its symbols were Verdun Guernica and Auschwitz By the end of this dark period tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized If the nineteenth century gave Europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization The fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis The Oxford Handbook of European History 1914 1945 reconsiders the most significant features of this calamitous age from a transnational

perspective It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments Readers will find innovative and stimulating chapters on various political social and economic subjects by some of the leading scholars working on modern European history today The Dynamic Society Graeme Snooks,2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions The Relentless Revolution: A History of Capitalism Joyce Appleby,2011-03-07 The unlikely development of a potent historical force told with grace insight and authority by one of our best historians With its deep roots and global scope the capitalist system provides the framework for our lives It is a framework of constant change sometimes measured and predictable sometimes drastic and out of control Yet what is now ubiquitous was not always so Capitalism took shape centuries ago starting with a handful of isolated changes in farming trade and manufacturing clustered in early modern England Astute observers began to notice these changes and consider their effects Those in power began to harness these new practices to the state enhancing both A system generating wealth power and new ideas arose to reshape societies in a constant surge of change The centuries long history of capitalism is rich and eventful Approaching capitalism as a culture as important for its ideas and values as for its inventions and systems Joyce Appleby gives us a fascinating introduction to this most potent creation of mankind from its origins to now Rondo Cameron Fouad Sabry,2024-02-07 Who is Rondo Cameron This individual Rondo Emmett Cameron was a professor of economic history in the United States Texas was his home state of origin After completing his undergraduate studies at Yale in 1948 he went on to earn a doctoral degree from the University of Chicago in 1952 Since the year 1952 he has been a professor at the University of Wisconsin Madison In 1969 he moved to Emory University where he served as a professor at Kenan University until his retirement as an emeritus professor in 1993 He held the position of president of the International Association for Economic History The book that he wrote in 1989 titled A Concise Economic History of the World From Paleolithic Times to the Present is what brought him a lot of attention There are sentences in one chapter that were taken from an introductory undergraduate lecture that was given at Yale in 1951 The preface states that the book had been in the process of maturing for a number of years How you will benefit I Insights about the following Chapter 1 Rondo Cameron Chapter 2 History of religion Chapter 3 Economic history Chapter 4 C Vann Woodward Chapter 5 Paul Kennedy Chapter 6 Peter Temin Chapter 7 Richard Ellmann Chapter 8 John Cockerill industrialist Chapter 9 Michael Rostovtzeff Chapter 10 Vernon Bogdanor Chapter 11 Geoffrey Barraclough Chapter 12 Mark Mazower Chapter 13 Economic history of the world Chapter 14 Peter Mathias Chapter 15 Richard Sylla Chapter 16 Emory Elliott Chapter 17 Richard Drayton Chapter 18 Robin Winks Chapter 19 Christopher Duggan Chapter 20 International Economic History Association Chapter 21 James W Flannery Who this book is

for Professionals undergraduate and graduate students enthusiasts hobbyists and those who want to go beyond basic knowledge or information about Rondo Cameron Scarcity and Frontiers Edward B. Barbier,2010-12-23 Throughout much of history a critical driving force behind global economic development has been the response of society to the scarcity of key natural resources Increasing scarcity raises the cost of exploiting existing natural resources and creates incentives in all economies to innovate and conserve more of these resources However economies have also responded to increasing scarcity by obtaining and developing more of these resources Since the agricultural transition over 12 000 years ago this exploitation of new frontiers has often proved to be a pivotal human response to natural resource scarcity This book provides a fascinating account of the contribution that natural resource exploitation has made to economic development in key eras of world history This not only fills an important gap in the literature on economic history but also shows how we can draw lessons from these past epochs for attaining sustainable economic development in the world today *Economic Miracles in the European Economies* Magdalena Osińska,2019-02-25 This book undertakes a theoretical and econometric analysis of intense economic growth in selected European countries during the end of the twentieth century and the beginning of the twenty first Focusing on the accelerated economic growth that occurred in Ireland the Netherlands Spain and Turkey this book investigates the determinants and consequences of this miracle growth and discusses them in context of growth and development processes observed in European market type economies after the World War II Using imperfect knowledge economics IKE as a theoretical framework to interpret the empirical results this book provides a fresh theoretical perspective in comparison with current Neo classical Keynesian and institutional paradigms With this systematic approach the authors seek to provide a unified methodology for evaluating the phenomenon of intense economic growth that has heretofore been missing from the discipline Combining diverse theoretical and methodological strategies to provide a holistic understanding of the historical process of economic change this volume will be of interest to students and scholars of economic growth econometrics political economy and the new institutional economics as well as policymakers *The Ephemeral Civilization* Graeme Snooks,2002-09-11 The Ephemeral Civilization is an astonishing intellectual feat in which Graeme Snooks develops an original and ground breaking analysis of changing sociopolitical forms over the past 3 000 years Snooks challenges the prevailing theories of social evolutionism with an innovative approach which also looks ahead to the twenty first century The Ephemeral Civilization builds on the model of dynamic strategy outlined in the author s highly acclaimed companion volume The Dynamic Society The Ephemeral Society is divided into three parts theory history and future *International Finance And Open-economy Macroeconomics: Theory, History, And Policy (2nd Edition)* Hendrik Van Den Berg,2016-02-22 International Finance and Open Economy Macroeconomics provides a complete theoretical historical and policy focused account of the international financial system that covers all of the standard topics such as foreign exchange markets balance of payments accounting macroeconomic policy in an open economy exchange rate crises multinational enterprises and

roots of society's longest hatred **The Great Divergence Reconsidered** Roman Studer, 2015-01-29 Studer shows that institutional geographical political and technological factors account for Europe's rise to undisputed world economic leader

Human Progress Amid Resistance to Change Joseph E. Pluta, 2011-04 In building their profession around carefully selected interpretations of the work of Adam Smith Alfred Marshall and others mainstream economists have embraced such concepts as the invisible hand equilibrium consumer rationality the marginal productivity theory the inevitability of diminishing returns and the fiction of pure competition In contrast the evolutionary economics of Thorstein Veblen and Clarence Ayres challenges all of these concepts as unproven and capable of telling us little or nothing about the actual operation of the economy Using the evolutionary framework *Human Progress Amid Resistance to Change* argues that all cultures since prehistory have faced two opposing forces technology including human knowledge and institutions rooted in ceremonialism The former is dynamic forward looking accepting of change cumulative one discovery builds on another and the major cause of human progress The latter is static and consists of all customs traditions superstitions rituals ceremonies taboos and past binding religious beliefs that resist change The book illustrates in detail how these competing forces have interacted throughout the history of the human race and how mainstream economics fails to grasp the significance of their combined effects **A History of the Global Economy** Colin White, 2018-11-30 Providing an exceptional overview and analysis of the global economy from the origins of Homo sapiens to the present day Colin White explores our past to help understand our economic future He veers away from traditional Eurocentric approaches providing a truly global scope for readers The main themes include the creative innovativeness of humans and how this generates economic progression the common economic pathway trodden by all societies and the complementary relationship between government and the market
