## **Concurrent Urbanities Designing Infrastructures Inclusion:**

**Concurrent Urbanities** Miodrag Mitrasinovic, 2015      *Concurrent Urbanities* Miodrag Mitrasinovic, 2015-10-14 Design has been employed as an agent of social and political change and a catalyst for spatial and urban transformations in cities across the world. Concurrent Urbanities argues for the centrality of designing in the conceptualization and production of inclusive and participatory urban space by bringing together civic and urban activists, urbanists, designers, and architects committed to exploring designing as a socio-spatial praxis concerned with the reorganization of urban socio-economic systems and relations of power. The blend of first-hand experiences and reflections of the urban practitioners featured reframes design practice beyond the design of physical objects and public amenities to the design of social protocols, processes, and infrastructures for radically reframing practices of socio-spatial inclusion on the ground. Through illustrated examples, this book features the work of Stalker and Stealth who employ design to negotiate new social contracts, Teddy Cruz's design of urban political and economic processes, models of urban pedagogy by the Center for Urban Pedagogy, Cohabitation Strategies' work on designing urban social cooperatives, and others. Concurrent Urbanities presents a compendium of the emerging models of design-driven urban practice that offers important new insights to professional urban practitioners as well as to students of urbanism, architecture, urban design, and urban and spatial planning.

**Design and the Social Imagination** Matthew DelSesto, 2022-09-22 How can social theory help us all design solutions to address the social, political, and ecological challenges that confront us and build more sustainable communities? Design professions have typically been associated with intervention and action, while social science has long been associated with thought and reflection. Design and social thought are too frequently considered distinct in terms of how theories can be applied in practice. Design and the Social Imagination brings together the creative, action-oriented sensibility of design with the reflective, analytical capacities of the social sciences to offer models, ideas, and strategies for shaping the future of the world we live in. In a world of global economic inequality, racism, and environmental degradation, designing with an understanding of our social reality is increasingly crucial to our survival. Matthew DelSesto explores current practices and discourses in areas of urban design, design for social innovation, environmental design, co-design, service design, and more, illustrating how thoughtful design can contribute in a more productive way. Drawing on a range of theory and practice from radical social thinkers, C Wright Mills, Patrick Geddes, Jane Addams, and W. E. B. Du Bois, his book shows us how design and the social sciences can interact in order to intervene in the crises we face today.

*The Emerging Public Realm of the Greater Bay Area* Miodrag Mitrašinović, Timothy Jachna, 2021-07-29 Through illustrated case studies and conceptual reframings, this volume showcases ongoing transformations in public space and its relationship to the public realm, more broadly, in the world's most populous urban megaregion, the Greater Bay Area of southeastern China, projected to reach eighty million inhabitants by the year 2025. the context of this region's rapid urban development in the last forty years bringing together authors from urbanism architecture planning sociology anthropology and politics to examine innovative ways of framing and conceptualizing public space in of the Greater Bay Area The blend of authors first hand practical experiences has created a unique cross disciplinary book that employs public space to frame issues of planning political control social inclusion participation learning education and appropriation in the production of everyday urbanism In the context of the Greater Bay Area such spaces and practices also present opportunities for reconfiguring design driven urban practice beyond traditional interventions manifested by the design of physical objects and public amenities to the design of new social protocols processes infrastructures and capabilities This is a captivating new dimension of urbanism and critical urban practice and will be of interest to academics students and practitioners interested in urbanization in China

**Public Space Unbound** Sabine Knierbein, Tihomir

Viderman, 2018-03-15 Through an exploration of emancipation in recent processes of capitalist urbanization this book argues the political is enacted through the everyday practices of publics producing space This suggests democracy is a spatial practice rather than an abstract professional field organized by institutions politicians and movements Public Space Unbound brings together a cross disciplinary group of scholars to examine spaces conditions and circumstances in which emancipatory practices impact the everyday life of citizens We ask How do emancipatory practices relate with public space under post political conditions In a time when democracy solidarity and utopias are in crisis we argue that productive emancipatory claims already exist in the lived space of everyday life rather than in the expectation of urban revolution and future progress

**Theorizing Heritage through Non-Violent Resistance** Feras Hammami,Evren Uzer,2022-04-25 This book is about the entanglement of heritage and resistance in different

situations of conflicts and the opportunities this entanglement may provide for social justice This entanglement is investigated in the different contributions through theoretical and empirical analyses of heritage led resistance to neoliberal economic development violation of the subaltern authorised narratives and state invented traditions colonialism and settler colonialism and even dominating discourses of social movement to name just a few Crossing the disciplinary boundaries of heritage and resistance studies these analyses bring new insights into several timely debates especially those concerned with the interrelated critical questions of displacement gentrification exclusion marginalization urbicide spatial cleansing dehumanization alienation ethnic cleansing and social injustice Following our purposeful and future driven approach we wish to bring new energy to the field of heritage studies through the focus on the potential of heritage and resistance for hopeful change rather than adding to the field yet another overwhelming engagement with conflict and war

The Ethics of a Potential Urbanism Camillo Boano, 2016-11-25 The Ethics of a Potential Urbanism explores the possible and potential relevance of Giorgio Agamben's political thoughts and writings for the theory and the practice of architecture and urban design It sketches out the potentiality of Agamben's politics which can affect change in current architectural and design discourses The book investigates the possibility of an inoperative architecture as an ethical shift for a different practice just a little bit different but able to deactivate the sociospatial dispositive and mobilize a new theory and a new project for the urban now to come This particular reading from Agamben's oeuvre suggests a destituent mode of both thinking and practicing of architecture and urbanism that could possibly redeem them from their social emptiness cultural irrelevance economic reductionism and proto avant garde extravagance contributing to a renewed critical encounter with architecture's aesthetic political function

*Informality through Sustainability* Antonino Di Raimo, Steffen Lehmann, Alessandro Melis, 2020-12-30 Informality through Sustainability explores the phenomenon of informality within urban settlements and aims to unravel the subtle links between informal settlements and sustainability Penetrating its global profile and considering urban informality through an understanding of local implications the authors collectively reveal specific correlations between sites and their local inhabitants The book opposes simplistic calls to legalise informal settlements or to view them as problems to be solved It comes at a time when common notions of informality are being increasingly challenged In 25 chapters the book presents contributions from well known scholars and practitioners whose theoretical or practical work addresses informality and sustainability at various levels from city planning and urban design to public space and architectural education Whilst previous studies on informal settlements have mainly focused on cases in developing countries approaching the topic through social cultural and material dimensions the book explores the concept across a range of contexts including former Communist countries and those in the so called Global North Contributions also explore understandings of informality at various scalar levels region precinct neighbourhood and individual building Thus this work helps reposition informality as a relational concept at various scales of urbanisation This book will be of great benefit to

planners architects researchers and policymakers interested in the interplay between informality and sustainability
