**Nanostructured Epoxy / Rubber Blends** Sabu Thomas,Christophe Sinturel,Raju Thomas,2014-11-03 Epoxy resins are polymers which are extensively used as coating materials due to their outstanding mechanical properties and good handling characteristics A disadvantage results from their high cross link density they are brittle and have very low resistance to crack growth and propagation This necessitates the toughening of the epoxy matrix without impairing its good thermomechanical properties The final properties of the polymer depend on their structure The book focuses on the microstructural aspects in the modification of epoxy resins with low molecular weight liquid rubbers one of the prime toughening agents commonly employed The book follows thoroughly the reactions of elastomer modified epoxy resins from their liquid stage to the network formation It gives an in depth view into the cure reaction phase separation and the simultaneous development of the morphology Chapters on ageing failure analysis and life cycle analysis round out the book

### **Propellants and Explosives**

Naminosuke Kubota,2015-04-22 Propellants and Explosives Explosives and propellants are termed energetic materials for containing considerable chemical energy which can be converted into rapid expansion In contrast to simple burning of a fuel explosives and propellants are self contained and do not need external supply of oxygen via air Since their energy content thus inherently creates the risk of accidental triggering of the explosive reaction proper synthesis formulation and handling during production and use are of utmost importance for safety and necessitate specialist knowledge on energetic materials their characteristics handling and applications Now in its third edition the classic on the thermochemical aspects of the combustion of propellants and explosives is completely revised and updated and includes green propellants as new topic The combustion processes of typical energetic crystalline and polymeric materials and various types of propellants and pyrolants are presented to provide an informative generalized approach for the understanding of the combustion mechanisms of those materials The first half of the book represents an introductory text on pyrodynamics describing fundamental aspects of the combustion of energetic materials The second half highlights applications of energetic materials as propellants explosives and pyrolants with focus on phenomena occurring in rocket motors In addition the appendix gives a brief overview of the

fundamentals of aerodynamics and heat transfer which is a prerequisite for the study of pyrodynamics A detailed reference for readers interested in rocketry or explosives technology   **Explosives** Rudolf Meyer,Josef Köhler,Axel

GOLEA,Catalin HIDEG,2022-09-07 These are just some of the questions to be addressed in this paper We do not pretend to give the final and complete answers as the field under study still has many grey areas and even some areas completely unexplored by scientific research We aim to at least open the discussion on the subject of bioterrorism without claiming to be the supreme authority in the field or the final voice We do not even pretend that our work is relevant in terms of security solutions in such a complex and fluid security environment where situations and states of affairs can change dramatically from year to year However our aim in this series of papers on bioterrorism is to clarify a number of notions concepts and theoretical or practical issues necessary for the general public to understand what bioterrorism is all about and what we should expect in the coming years At the time of writing the COVID 19 crisis is still in full swing despite some apparent improvements over the last few weeks This may only be the beginning of a series of widening and deepening crises that are hitting human society again and again confronting it with great existential questions The current COVID 19 crisis is and will continue to be followed by severe economic and social impacts that are almost impossible to predict Situations in which crises break out everywhere and in all sorts of ways and situations in which the states of the world are gathering into increasingly isolated and hostile groups are nothing other than the specific preconditions for the outbreak of world conflicts We have no intention whatsoever of promoting defeatism or of creating and spreading alarmist rumours for who knows what obscure purposes The situation is simply worrying at times reaching alarming levels that go beyond mere fear of the future The bioterrorist phenomenon is beginning to emerge more and more clearly as a concrete threat to the present and the near future From this point of view an effort will have to be made or at least begun to enlighten the general public on how this new threat could materialise Authors C t lin Hideg Daniela Georgiana Golea   **Naval Research Reviews** ,1983   *High Energy Materials* Jai Prakash Agrawal,2015-11-20 Authored by an insider with over 40 years of high energy materials HEMs experience in academia industry and defense organizations this handbook and ready reference covers all important HEMs from the 1950s to the present with their respective properties and intended purposes Written at an attainable level for

professionals engineers and technicians alike the book provides a comprehensive view of the current status and suggests further directions for research and development An introductory chapter on the chemical and thermodynamic basics allows the reader to become acquainted with the fundamental features of explosives before moving on to the important safety aspects in processing handling transportation and storage of high energy materials With its collation of results and formulation strategies hitherto scattered in the literature this should be on the shelf of every HEM researcher and developer

**BIOTERRORISMO DANIELA GEORGIANA GOLEA,2023-06-05** El mundo en el que vivimos se ve cada vez más sacudido por crisis que se originan en la biosfera terrestre o que afectan a la biosfera de un modo u otro. Y en última instancia a los HUMANOS S LA ABEJA HUMANA que a menudo olvida o intenta olvidar que es parte integrante e indisoluble de la biosfera de este planeta. Hacia finales del siglo 19th estalló la crisis alimentaria que posteriormente provocó graves problemas sociales y en cierto modo el estallido de las dos guerras mundiales. La justificación del espacio vital especialmente en la lucha de la Segunda Guerra Mundial estaba relacionada principalmente con la supervivencia biológica de la especie humana. Fue en el siglo 20th cuando aparecieron los primeros indicios de la crisis medioambiental ligada al cambio climático a principios de 1960s cuando se hizo cada vez más evidente que se estaban produciendo cambios en el clima mundial. Posteriormente la crisis de la energía se situó de origen puramente natural pasó a primer plano con la decisión de la OPEP Organización de Países Exportadores de Petróleo de reducir o cortar el suministro de estos recursos energéticos naturales a determinados países industrializados. Más tarde algunas regiones del planeta en particular el continente africano se vieron gravemente afectadas por la crisis del agua y de los alimentos y ahora esas mismas regiones también se ven afectadas por numerosas crisis más dadas provocadas por la acción de biopatógenos infecciosos muy agresivos. A finales de los años 70s surgió una nueva creciente y aterradora amenaza. El VIH SIDA un virus que extrañamente y hasta la fecha no se ha explicado ni demostrado científicamente de forma edificante y de forma repentina surgió de una región salvaje de África. Además otras amenazas igualmente terroríficas como el virus EBOLA surgieron aproximadamente de la misma región. Por último pero no por ello menos importante los conflictos mundiales han aumentado y con ellos ha surgido un verdadero boom demográfico que ha provocado un aumento preocupante de la necesidad de alimentos refugio y espacio vital dentro del ecosistema. Como consecuencia la calidad del medio ambiente y del suministro público de alimentos se ha deteriorado y la especie humana ha experimentado un aumento de las enfermedades causadas por la mala calidad de los alimentos con un incremento de la enfermedad en particular. La humanidad de finales del primer cuarto del siglo 21st se nos presenta pues como una mezcla heterogénea de razas, etnias, culturas y civilizaciones en constante confrontación a veces con terrible violencia. Al mismo tiempo el medio ambiente se encuentra en un proceso continuo y

acelerado de degradaci n y los ecosistemas sufren cada vez m s El aumento de los conflictos mundiales tambi n est provocando el incremento de las reservas de armas convencionales y no convencionales aunque en este ltimo caso el crecimiento se produce de forma mucho m s discreta tratando de eludir los l mites impuestos por el derecho internacional p blico Qu panorama tan extra o y gris parece En un contexto tan problem tico y preocupante el presente trabajo intenta abordar algunos temas generalmente evitados por la literatura de los ltimos a os analizando incluso aquellos aspectos sensibles que no son aceptados por la pol tica oficial de la mayor a de los pa ses Desgraciadamente aunque la pr ctica de censurar obras ya no est oficialmente en vigor dicho control se sigue ejerciendo invocando la mayor a de las veces el aspecto de lo pol ticamente correcto Cuando una obra no se considera pol ticamente correcta por diversas razones relacionadas con su contenido o con la forma de abordarlo y tratarlo acaba siendo censurada rechazada en parte o en su totalidad de la publicaci n y en consecuencia no ser respaldada por quienes se consideran oficialmente las principales autoridades en la materia No pretendemos provocar o amplificar conflictos ni crear un estado de tensi n en relaci n con los temas tratados sino que deseamos aclarar ciertos conceptos y ciertas cuestiones relacionadas con la seguridad actual y del futuro pr ximo Para ello hemos optado por que el planteamiento de los problemas est libre de prohibiciones o limitaciones de car cter pol tico propagand stico y de cualquier otra ndole salvo los criterios espec ficos de los trabajos cient ficos la existencia de un aparato cient fico la fundamentaci n y demostraci n de afirmaciones de cierta naturaleza la especificaci n del car cter hipot tico de aspectos para los que no existen pruebas ciertas la especificaci n como opiniones propias de aquellas afirmaciones que no resultan de determinaciones objetivas y no constituyen afirmaciones de otros etc Al adoptar este enfoque hemos tratado de situarnos en una posici n ecu nime intentando ver la situaci n de la manera m s neutral posible Nuestra motivaci n es tratar de responder a algunas preguntas fundamentales sobre la seguridad mundial en este siglo que est resultando tan complicado Es el bioterrorismo una amenaza real Proliferar el fen meno terrorista y si es as de qu forma 7 Cu les podr an ser los nichos de cualquier naturaleza a trav s de los cuales podr a formarse y evolucionar el bioterrorismo en un futuro pr ximo y medio Qu biopat genos podr an ser el objetivo de una posible organizaci n terrorista y c mo podr an utilizarse Cu l es la situaci n del sector m dico farmac utico desde el punto de vista econ mico La gesti n econ mica del sector m dico farmac utico es en ltima instancia sin nimo de su gesti n de la seguridad Cu l deber a ser el terreno y el estatus correctos del mbito m dico farmac utico dentro del sistema de seguridad nacional Puede el estado de la econom a ser una ventaja para el fen meno terrorista Cu l es la situaci n econ mica del fen meno bioterrorista Estas son s lo algunas de las cuestiones que se abordan en este documento No pretendemos dar las respuestas definitivas y completas ya que el campo de estudio tiene todav a muchas zonas grises e incluso algunas reas completamente inexploradas por la investigaci n cient fica Pretendemos al menos abrir el debate sobre el tema del bioterrorismo sin pretender ser la autoridad suprema en la materia ni la voz final Ni siquiera pretendemos que nuestro trabajo sea relevante en t rminos de soluciones de seguridad en un entorno de seguridad tan

GOLEA,2024-08-13 Die Welt in der wir leben wird zunehmend von Krisen erschüttert die ihren Ursprung in der terrestrischen Biosphäre haben oder die Biosphäre auf die eine oder andere Weise beeinflussen Und letztlich auch den MENSCHEN Ja der MENSCHEN der oft vergisst oder zu vergessen versucht dass er ein integraler und untrennbarer Teil der Biosphäre dieses Planeten ist Gegen Ende des 19th Jahrhunderts brach die Erneuerungskrise aus die in der Folge zu schwerwiegenden sozialen Problemen und in gewisser Weise zum Ausbruch der beiden Weltkriege führte Die Rechtfertigung des Lebensraums insbesondere in der Logik des Zweiten Weltkriegs bezog sich hauptsächlich auf das biologische Überleben der menschlichen Gattung Die ersten Anzeichen einer Umweltkrise im Zusammenhang mit dem Klimawandel traten im 20. Jahrhundert auf Anfang 1960s als immer deutlicher wurde dass sich das Weltklima verändert Die Krise der fossilen Energieträger rein natürlichen Ursprungs trat dann mit der Entscheidung der OPEC Organisation der exportierenden Länder in den Vordergrund die Lieferung dieser natürlichen Energieträger an bestimmte Industrieländer zu reduzieren oder ganz einzustellen Später wurden bestimmte Regionen der Erde insbesondere der afrikanische Kontinent von der Wetter und

Nahrungsmittelkrise schwer getroffen und jetzt sind dieselben Regionen auch von zahlreichen medizinischen Krisen betroffen die durch die Wirkung hochaggressiver infekti ser Biopatogene verursacht werden Ende der 1970er Jahres tauchte eine neue wachsende und erschreckende Bedrohung auf HIV AIDS ein Virus das auf bizarre Weise und bis heute nicht wissenschaftlich erkl rt oder bewiesen pl tzlich in einer wilden Region Afrikas auftauchte Dar ber hinaus kamen andere ebenso furchterregende Bedrohungen wie das EBOLA Virus aus etwa derselben Region Nicht zuletzt haben die weltweiten Konflikte zugenommen und damit ein regelrechter Bev lkerungsboom eingesetzt der zu einem besorgniserregenden Anstieg des Bedarfs an Nahrung Unterkunft und Lebensraum im kosystem gef hrt hat Infolgedessen hat sich die Qualit t der Umwelt und der ffentlichen Nahrungsmittelversorgung verschlechtert und bei der menschlichen Spezies ist es zu einem Anstieg der durch schlechte Nahrungsmittelqualit t 6 verursachten Krankheiten gekommen insbesondere zu einer Zunahme von Krebserkrankungen Die Menschheit am Ende des ersten Viertels des 21 st Jahrhunderts erscheint uns daher als eine heterogene Mischung von Rassen Ethnien Kulturen und Zivilisationen die in st ndiger Konfrontation stehen manchmal mit schrecklicher Gewalt Gleichzeitig ist die Umwelt in einem kontinuierlichen und sich beschleunigenden Prozess der Degradation begriffen und die kosysteme leiden immer mehr Die zunehmenden globalen Konflikte f hren auch zu wachsenden Best nden an konventionellen und nicht konventionellen Waffen auch wenn im letzteren Fall die Zunahme in sehr viel diskreteren Formen erfolgt und versucht wird die vom V lkerrecht auferlegten Grenzen zu umgehen Was f r ein seltsames und graues Bild In einem solch beunruhigenden und besorgniserregenden Kontext versucht die vorliegende Arbeit einige Themen anzusprechen die in der Literatur der letzten Jahre im Allgemeinen vermieden wurden und dabei auch jene sensiblen Aspekte zu analysieren die von der offiziellen Politik der meisten L nde nicht akzeptiert werden Obwohl die Praxis der Zensur von Werken offiziell nicht mehr in Kraft ist wird eine solche Kontrolle leider immer noch ausge bt wobei man sich meist auf den Aspekt der politischen Korrektheit beruft Wenn ein Werk aus verschiedenen Gr nden die mit seinem Inhalt oder der Art und Weise wie es behandelt wird zusammenh ngen nicht als politisch korrekt angesehen wird wird es schlie lich censiert ganz oder teilweise von der Ver ffentlichung ausgeschlossen und folglich auch nicht von denjenigen gebilligt die offiziell als die f hrenden Autorit ten auf diesem Gebiet gelten Wir haben nicht die Absicht Konflikte zu provozieren oder zu verst rken oder einen Spannungszustand in Bezug auf die behandelten Themen zu schaffen sondern wir m chten bestimmte Konzepte und bestimmte Fragen im Zusammenhang mit der aktuellen und zuk nftigen Sicherheit kl ren Zu diesem Zweck haben wir uns daf r entschieden dass die Herangehensweise an die Probleme frei von jeglichen Verboten oder Zw ngen politischer propagandistischer oder sonstiger Art sein soll mit Ausnahme der spezifischen Kriterien wissenschaftlicher Arbeiten das Vorhandensein eines wissenschaftlichen Apparats die Untermauerung und Demonstration von Aussagen eines bestimmten Charakters die Spezifizierung des hypothetischen Charakters von Aspekten f r die es keine sicheren Beweise gibt die Spezifizierung derjenigen Behauptungen die nicht auf objektiven Feststellungen beruhen und keine Aussagen anderer

darstellen als eigene Meinung usw Mit diesem Ansatz haben wir versucht uns in eine unparteiische Position zu bringen und die Situation so neutral wie möglich zu betrachten 7 Unsere Motivation ist der Versuch einige grundlegende Fragen zur globalen Sicherheit in diesem Jahrhundert zu beantworten das sich als so kompliziert erweist Ist Bioterrorismus eine echte Bedrohung Wird sich das Phänomen des Terrorismus ausbreiten und wenn ja in welcher Form In welchen Nischen welche Art auch immer kommt es sich der Bioterrorismus in naher und mittlerer Zukunft bilden und weiterentwickeln Welche Biopathogene kommen von einer potenziellen terroristischen Organisation ins Visier genommen werden und wie kommen sie eingesetzt werden Wie ist die Situation des medizinisch pharmazeutischen Sektors aus wirtschaftlicher Sicht Ist das wirtschaftliche Management des medizinisch pharmazeutischen Sektors letztlich gleichbedeutend mit seinem Sicherheitsmanagement Welchen Platz und welchen Status sollte der medizinisch pharmazeutische Bereich innerhalb des nationalen Sicherheitssystems haben Kann der Zustand der Wirtschaft ein Vorteil für das terroristische Phänomen sein Wie ist die wirtschaftliche Situation im Zusammenhang mit dem Bioterrorismus Dies sind nur einige der Fragen die in diesem Papier behandelt werden sollen Wir erheben nicht den Anspruch endgültige und vollständige Antworten zu geben da es auf dem untersuchten Gebiet noch viele Grauzonen und sogar einige von der wissenschaftlichen Forschung völlig unerforschte Bereiche gibt Wir wollen zumindest die Diskussion über das Thema Bioterrorismus eröffnen ohne den Anspruch zu erheben die oberste Autorität auf diesem Gebiet oder die letzte Stimme zu sein Wir geben nicht einmal vor dass unsere Arbeit für Sicherheitslungen in einem so komplexen und fluiden Sicherheitsumfeld relevant ist in dem sich Situationen und Zustände von Jahr zu Jahr dramatisch ändern können Mit dieser Reihe von Papieren über Bioterrorismus wollen wir jedoch eine Reihe von Begriffen Konzepten und theoretischen oder praktischen Fragen klar machen die für die breite Öffentlichkeit notwendig sind um zu verstehen worum es beim Bioterrorismus geht und was wir in den kommenden Jahren erwarten sollten Zum Zeitpunkt der Erstellung dieses Berichts ist die COVID 19 Krise trotz einiger offensichtlicher Verbesserungen in den letzten Wochen immer noch in vollem Gange Möglicherweise ist dies nur der Anfang einer Reihe von sich ausweitenden und vertiefenden Krisen die die menschliche Gesellschaft treffen und sie immer wieder mit großen existenziellen Fragen konfrontieren Die derzeitige COVID 19 Krise hat und wird auch in Zukunft schwerwiegende wirtschaftliche und soziale Auswirkungen haben die kaum vorhersehbar sind Situationen in denen berall und auf alle möglichen Arten Krisen ausbrechen und Situationen in denen sich die Staaten der Welt zu immer isolierteren und feindlicheren Gruppen zusammenschließen sind nichts anderes als die spezifischen Voraussetzungen für den Ausbruch von Weltkonflikten Wir haben keineswegs die Absicht Desasmus zu fordern oder alarmistische Gerüchte für wer weiß was für obskure Zwecke zu verbreiten Die Situation ist einfach besorgniserregend und erreicht zuweilen ein Ausmaß das über die bloße Angst vor der Zukunft hinausgeht Das Phänomen des Bioterrorismus zeichnet sich immer deutlicher als konkrete Bedrohung für die Gegenwart und die nahe Zukunft ab Unter diesem Gesichtspunkt müssen Anstrengungen unternommen oder zumindest begonnen werden um die breite Öffentlichkeit darüber aufzuklären wie sich

diese neue Bedrohung verwirklichen kannnte
