Teachers of grades K-12 will find short probes with grade band specifics that provide easy-to-follow suggestions for addressing students' ideas by promoting learning through conceptual change instruction. **The Story of Science: Newton at the Center** Joy Hakim, 2016-04-26. In volume two, students will watch as Copernicus's systematic observations place the sun at the center of our universe to the dismay of establishment thinkers. After students follow the achievements and frustrations of Galileo, Kepler, and Descartes, they will appreciate the amazing Isaac Newton whose discoveries about gravity, motion, colors, calculus, and Earth's place in the universe set the stage for modern physics, astronomy, mathematics, and chemistry. In the three-book *The Story of Science* series, master storyteller Joy Hakim narrates the evolution of scientific thought from ancient times to the present. With lively, character-driven narrative, Hakim spotlights the achievements of some of the world's greatest scientists and encourages a similar spirit of inquiry in readers. The books include hundreds of color photographs, charts, maps, and diagrams, informative sidebars, suggestions for further reading, and excerpts from the writings of great scientists.
