Engaging In Evaluation And Assessment Research:

Engaging in Evaluation and Assessment Research Peter Hernon, Robert E. Dugan, Danuta A. Nitecki, 2011-06-24
Evaluation and assessment are integral parts of the research process. Research is something that all library managers need to know how to do, but the evaluation and assessment results are only valuable if they also understand how to apply them to managerial decision making, planning, and communication with library stakeholders. Increasingly, libraries must address questions of accountability, efficiency, effectiveness, and impact, the extent to which a program causes positive changes in the target population. All of these issues are important to library managers and those to whom they directly report. With the heightened interest in customer expectations and increased focus on service quality and customer satisfaction, evaluation and assessment research provides the essential methodology for library managers to obtain meaningful answers. This book introduces evaluation and assessment, explains evaluation and assessment research as a formal inquiry process with individual components, and demonstrates the use of the evidence gathered for planning, decision making, and accountability.

Place-Based Community Engagement in Higher Education Erica K. Yamamura, Kent Koth, 2023-07-03
While an increasing number of universities have or are committed to engaging their campuses in their surrounding communities, many recognize they lack the strategic focus and resources to maximize and sustain their impact on those communities. Place-based community engagement provides a powerful way to creatively connect campus and community to foster positive social transformation. In developing community engagement strategies, most universities and community organizations face significant challenges in deciding who to partner with and why. Frequently, this leads universities and community organizations to say yes to too many opportunities, which significantly limit their ability to pursue long-term impact. Focusing on an established geographic area can make it much easier to decide where to deploy resources and which partnerships to prioritize, and thus increase their ability to form strong and sustainable partnerships that are of greater value to all stakeholders. This book presents the emerging model of place-based community engagement as a powerful process for attaining more positive and enduring results in their local communities, as well as stimulating wider engagement by campus constituencies. Drawing upon the concept of collective impact and using data-driven decision making, place-based initiatives build long-term partnerships based upon a shared vision. Done thoughtfully, these place-based initiatives have attained impressive results. Drawing upon the case studies of five institutions that have implemented place-based community engagement initiatives, the authors provide guidance on the opportunities, challenges, and considerations involved in putting a place-based approach into effect. By sharing the experiences of these five institutions, they describe in detail the routes each took to turn their place-based initiatives from concept to reality and the results they achieved. [Introduction to Research in Leadership](#) David M. Rosch, Lori E. Kniffin, Kathy L. Guthrie, 2023-06-01
