Palma, Jack Dongarra, Vicente Hernandez, 2003-06-29 This book is the nal outcome of VECPAR 2000 4th International Meeting on Vector and Parallel Processing VECPAR constitutes a series of conferences which have been organized by the Faculty of Engineering of the University of Porto since 1993 with the main objective of disseminating new knowledge on parallel computing Readership of This Book The book is aimed at an audience of researchers and graduate students in a broad range of scienti c areas including not only computer science but also applied mathematics and numerical analysis physics and engineering Book Plan From a total of 66 papers selected on the basis of extended abstracts for p sentation at the conference a subset of 34 papers were chosen during a second review process leading to their inclusion in the book together with the invited talks The book contains a total of 40 papers organized into 6 chapters where each may appeal to people in di erent but still related scienti c areas All ch ters with the exception of Chapter 6 are initiated by a short text providing a quick overview of the organization and papers in the chapter The 13 papers in Chapter 1 cover the aspects related to the use of multiple processors Operating systems languages and software tools for scheduling and code transformation are the topics included in this chapter initiated by the talk on computing over the Internet entitled Grid Computing by Ian Foster **Alerta**, 1979 **The Significance of Rock Fabrics for the Geological Interpretation of Geophysical Anisotropies** Siegfried Siegesmund, 1996 *The Authority of the Bible and the Rise of the Modern World* Graf Henning Reventlow, 1985 This engrossing book demonstrates that the cradle James Barr of biblical criticism really lay in the English speaking world and that subsequent problems actually began in England in the period between the Reformation and the Enlightenment During this time attempts were still being made on a regular basis to reconcile the content of the Bible with the questioning of it which was evolving as the result of new scientific discoveries and the development of new moral criteria In this interdisciplinary study Professor Reventlow leads the reader into the total context of the life and thought in which new ideas about the Bible came to birth Beginning with the insights of early

humanism and the spiritualist movements of the Reformation and moving through the Puritans to a climax with the Deists Reventlow traces the fascinating and complex history of biblical criticism always emphasizing the close connection between theology philosophical systems and church politics He illuminates the significance of the intellectual and constitutional development in England for the modern understanding of the Bible and conversely he highlights the role of the Bible in that development The importance of this book is threefold It is historical It gives us insight into the way biblical understanding is achieved And it helps us understand how we ourselves work and think James Barr If we are to answer the theological questions of our time it is Reventlow s contention that the reply must pioneer its way out of its past For only a careful survey of the way we have come so far can clarify existing intrinsic presuppositions and help us to overcome them by making us aware of them from back cover
